

ATTACHMENT CATALOGUE 2023-2024

INTRODUCTION

Welcome to the wonderful world of Bobcat Attachments

Explore the true versatility of your Bobcat machine using genuine attachments. Bobcat attachments and implements help you grow your business, replace less-efficient machines, and give you the tools to accomplish major projects.

Tackle any job with ease and peace of mind: from construction to demolition, forestry to landscaping, and agriculture to snow removal.

Work all seasons, all year round. With Bobcat attachments, you can do it all!

- 1. Select the right attachment from the widest offering in the Industry.
- 2. Ensure the perfect match with your machine, with the guaranteed best performance.
- 3. Work harder with stronger components and design to tackle the toughest jobs.
- 4. Rely on the best dealer support, parts and service.
- 5. Explore the full potential of your machine with maximum productivity.
- 6. Work all year round to grow your business.
- 7. Operate with peace of mind with a 12-month warranty on every serial-numbered Bobcat attachment.

Choose the right attachment and implement for your:

- Compact Excavators
- Mini Track Loaders
- Compact Track Loaders
- Skid Steer Loaders
- Small Articulated Loaders
- Compact Wheel Loaders
- Compact Tractors
- Telehandlers and Rotary Telehandlers
- Backhoe Loaders

Use this guide to find the best Bobcat attachment combinations for your everyday tasks, occasional projects, and seasonal needs.

Please visit www.bobcat.com for more information and to locate the Bobcat dealer closest to you. They will be happy to help you with any inquiries you may have.

ABOUT US

The Company: Global with North Dakota Roots

Bobcat Company leads the industry in the design, manufacture, marketing and distribution of compact equipment for construction, rental, landscaping, agriculture, grounds maintenance, government, utility, industry and mining. We strive to empower our customers to do their jobs more efficiently and effectively.

Having started in 1947, our roots are deep in North Dakota, USA. Bobcat Company is the state's largest manufacturer, with 3 North Dakota production facilities. Global Bobcat manufacturing facilities are located in France, Czech Republic and China, with several parts warehouses across the globe.

Bobcat Company is a subsidiary of Doosan Bobcat Inc., a wholly owned subsidiary of Doosan Infracore Co., Ltd.

Bobcat Company entered the EMEA market in the 1960s. Since then, we have continued to invest and expand. Today, we offer a state-of-the-art manufacturing site, an Innovation Centre and a Bobcat Institute in Dobříš (Prague area), Czech Republic.

The Brand: Bobcat - One Tough Animal

The renowned Bobcat brand – ours since the name was first used in 1962 – is synonymous with durability and dependability. Tough, versatile, agile Bobcat equipment – with its time-tested reliability – has rightly earned the nickname "One Tough Animal." Bobcat Company continues to be committed to delivering the industry's best compact equipment.

The Dealers: Standing Behind Every Machine

Bobcat Company has the most extensive compact equipment distribution network in the world. Some 1,000 independent Bobcat dealers back each and every piece of Bobcat equipment, serving customers with thousands of local sales, service, parts and rental specialists. Bobcat dealers are known for their dedication to providing outstanding customer service to ensure long, reliable equipment performance.

In EMEA, we have over 200 Bobcat Dealers and 148 Bobcat Sub-dealers at your service.

The Bobcat Institute: For the Best Customer Experience

Bobcat dealers can rely on professional support from Bobcat product and service specialists. They also benefit from state-of-the-art training facilities with professional demonstrators, trainers and online courses for best practice and knowledge sharing. Most equipment and attachments are available for hands-on training, walk-arounds with experts and live demonstration.

WHY USE BOBCAT ATTACHMENTS

CONTACT US

Visit www.bobcat.com to find the nearest dealer to you.

Contact your Application Sales Manager for more details.

Become a fan on Facebook

Facebook is the single largest place for Bobcat fans to connect online. Join the conversation by liking our official page.

See videos on YouTube

YouTube is the best place to see Bobcat products in action. Watch our official videos and share your favourites.

Follow us on Twitter

Twitter helps you stay informed about everything Bobcat-related in real time. Get involved by following our page and using the #BobcatTough hashtag.

Follow us on Instagram

Instagram is your photosharing hub. Follow us, see what we're up to and share your behind-the-scenes shots for a chance to be featured on our page.

HOW TO READ THIS CATALOGUE

This catalogue contains 8 main chapters covering each Bobcat machine:

- Compact Excavators
- Compact Loaders
- Small Articulated Loaders
- Compact Wheel Loaders
- Compact Tractors
- Telehandlers
- Rotary Telehandlers
- Backhoe Loaders

Each chapter details the range of attachments suitable per carrier. The attachments are sorted and grouped by families. Please refer to the table of contents, the alphabetical index or the picture index to identify the best attachments for your needs.

Each page covers a specific attachment, with useful information to help you review the requirements, the key features and benefits, technical specifications and machine compatibility. An additional table may include options to run this attachment.

Many attachments have a YouTube logo referring to a video available to see the attachment in action. For the digital Catalogue version, the YouTube logo is dynamic and allows you to open the video link immediately.

Contact your Application Sales manager to discover the best sellers, the "demonstrator favourite" attachments and further guidance. We're here to help you find the best tool for your application!

Legend

In this catalogue, these symbols indicate the possible applications for the respective attachment.

Lifting & Handling

Forestry

Landscaping

Agriculture

Road work, Recycling & Cleaning

Snow removal

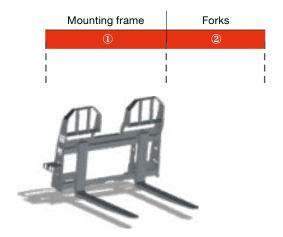

Construction & Demolition

Grading & Leveling

SELECTION INSTRUCTIONS

How to read and use the compatibility charts:

 Choose 1 reference in each requirement section depending on the machine

Example: Machine: S450 (Skid-Steer Loader)

Choose 1 reference in section ①:
 7297499.T – Pallet Fork Frame Standard

Choose 1 reference in section ②:
 6540182 – Pallet Fork Teeth 122 cm

| TECHNICAL SPECIFICATIONS | | | | | | |
|--------------------------------------|----------------|--------------------|----------------------|-------------------------|--------------|--------------------------------|

UK style buckets are equipped with dedicated teeth, available through parts.

Bobcat Company offers you a wide range of excavator buckets to choose from:

- Standard and heavy duty digging buckets
- Clay Spade Buckets (also known as banana buckets)
- Skeleton buckets (also known as riddle buckets)
- Grading buckets

It is important to note that all digging and skeleton buckets come with teeth as standard. Teeth kits are also available as option for clay spade buckets.

For grading and tilting buckets teeth options are not available.

COMPACT EXCAVATOR ATTACHMENTS

Explore the full versatility of your Bobcat Excavator using genuine Bobcat attachments. Choose from a wide range of excavator attachments and couplers to best meet your needs and applications.

For your convenience, Bobcat offers you a wide selection of attachments with Pin-on mountings, which can be used with the Bobcat coupler. Or you can opt for the mechanical Klac coupler system or the German system.

Pin-on system

The pin-on system is the standard system of hooking up buckets or other attachments, manually mounted with two pins directly to the excavator arm. This is the most straightforward and economical system to hook up and change attachments.

Mechanical pin grabber system

Our single visit Bobcat mechanical pin grabber couplers offer you an easy solution to change between pin-on attachments, without the need to leave the cab multiple times, thus saving you time and labor.

Hydraulic pin grabber system

The Bobcat hydraulic couplers offer you a safe, compliant, robust coupler solution allowing you to easily and rapidly do the changeover of pin-on attachments.

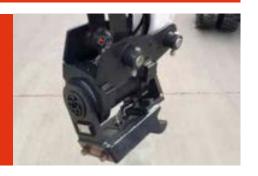

Klac® system

Our Klac mechanical quick coupler, with automatic self-locking mechanism, is a dedicated system ensuring a robust and compact solution to change and secure attachments.

German system

The German System Coupler is a proven technology allowing you to secure attachments easily and rapidly. It is a preferred system used especially in Germany. Choose from our wide range of German coupler offer, including mechanical, hydraulic and tilting options.

AUGER

Description: Speed and plumb-line accuracy are what you get with this high-torque, heavy-duty hydraulic auger. Its unique knuckle joint design allows it to hang plumb, even on uneven terrain. The entire drive unit follows the bit into the hole, adding 30 cm more dig depth than a standard unit. Ideal tool for drilling holes for posts, piers, poles and trees in all kinds of soil conditions.

BREAKER

REQUIREMENTS

FEATURES & BENEFITS

Hose Kit Fixing Cap Breaker

Tool (Optional)

Breaker includes: Nail Point, fixing cap bolts, gauge tool and hose protector. Special Application Kit must be installed on the machine.

- The cylindrical design improves access to jobs in confined areas, providing accurate attachment operation in more operating environments.
- Upper and lower shock absorbers isolate the breaker from the housing, reducing noise and vibration to deliver operator comfort without sacrificing performance. Silenced standard for all breaker models.
- Long-life breakers designed for all demolition jobs with minimal maintenance.
 The innovative steel ring feature allows retaining the tool bushing, protecting
- the grease access and provides a quick tool change solution.

 Designed for minimum downtime and with few service parts to reduce operation cost and improve overall lifetime of the attachment.
- Bobcat breakers produce low recoil and minimal hydraulic pressure spike to their carriers.
- Breakers can be mounted on your excavator with various systems: directly to the arm pin onto the arm, with the hydraulic quick coupler or with either of the two mechanical couplers – Klac and German Systems.

Description: Bobcat breakers offer high performance, low maintenance, and are easy to use. All breakers feature a frame with a cylindrical design, providing improved access to jobs in confined areas. All breakers have a silenced housing as standard.

BUCKET, DIGGING, HEAVY DUTY

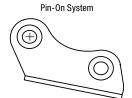

REQUIREMENTS

FEATURES & BENEFITS

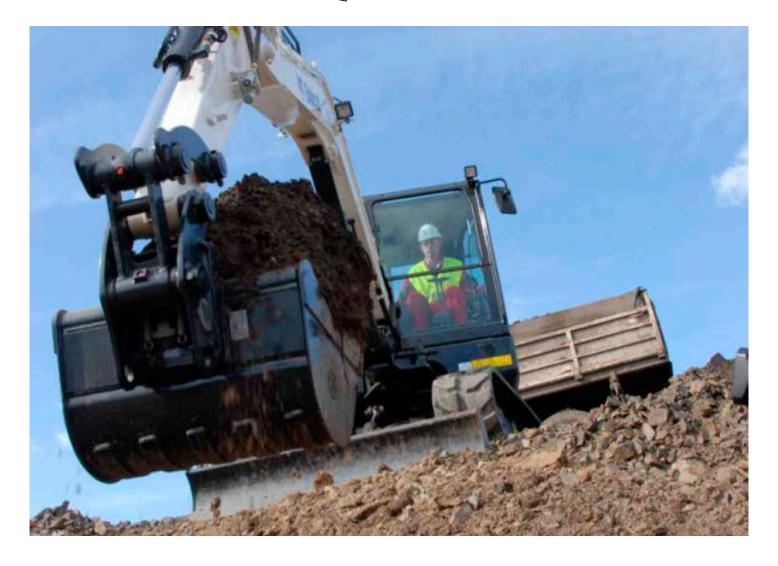

- Bolt-on teeth: Easily replace worn out teeth and utilise different styles of teeth (except E85: weld-on teeth)
- Optimised shape for maximum efficiency.
- Reinforced weld-on side cutter: Adds strength, durability and wear to the bucket sides; most beneficial in abrasive or rocky soils.
- Vertical wear bars/straps: Improve strength and durability while providing extra wear protection.

Description: Tackle the toughest digging and material handling jobs with our robust digging buckets. They offer excellent breakout force for digging and easier bucket filling.

^{*}Not approved as direct fit.

UK STYLE BUCKETS DURABLE AND COST-EFFECTIVE

- Durable Specific UK design guarantees long product life in many applications
- Competitive price Bobcat's engineering design assures maximum breakout force and low maintenance needs, while keeping these buckets competitive on the market.
- Additional features Wide range of options available, such as reversible cutting edges, teeth and other kits to fit any job site. Buckets are optimized to be attached directly or with Pin Grabber couplers.
- Direct fit or Pin Grabber Couplers
- Supporting ribs for additional robustness
- Choose between reversible cutting edge (Grading and Digging buckets) or teeth with integrated side cutter (Digging buckets only).
- Drain holes allow water to escape from the bucket, which helps in wet conditions
- Large selection of widths to best suit your needs

Learn more starting on page 35.

BUCKET, GERMAN PROFILE

Description: Tackle the toughest digging and material handling jobs with our robust digging buckets. They offer excellent breakout force for digging and easier bucket filling.

BUCKET, TILT

Description: Saves time and improves productivity. The tilt bucket is a grading bucket with an integrated hydraulic cylinder, allowing the bucket to be tilted to either side by 45° left and right. It saves you time on countless jobs by simply tilting the bucket instead of having to reposition the entire machine. It is ideal for land clearing, landscaping and backfilling.

COUPLER, HYDRAULIC

REQUIREMENTS

FEATURES & BENEFITS

Pin Grabber

- Robust yet compact and light design increasing breakout force
- Double locking system (Front and Rear) meeting ISO13031
- Powerful springs area activated
- in case of power loss.

 Variable pin center to increase pin on attachments pick up
- Maintenance free with few components
- Reversibility is standard, without modifications required
- Fast and easy installation.

German System Coupler

- Double locking coupler for greater safety, applying ISO 13031 norm
- Hydraulically operated from the cab for quick and easy attachment changeover
- · Pins under constant pressure to guarantee a tight grip
- Play-free locking in case of eventual nin wear
- · Robust, yet compact design for maximum breakout force
- Maintenance-free, with few components for peace of mind
- Also available with lifting hook 3-5 ton lifting capacity

Description: Hydraulically connected to the machine, the Bobcat Hydraulic Coupler allows you to change attachments rapidly and safely and from the comfort and security of your cab. It allows to take a variety of attachments.

NOTE: "HYDRAULIC QUICK COUPLER READY" OPTION IS NEEDED! AVAILABLE AS FACTORY OPTION OR AS KIT THROUGH BOBCAT PARTS USING A COUPLER MAY MODIFY THE STABILITY AND BREAKOUT FORCE OF THE EXCAVATOR. PLEASE CONTACT YOUR BOBCAT DISTRIBUTOR OR APPLICATION SALES MANAGER FOR MORE INFORMATION AND A LIST OF APPROVED ATTACHMENTS.

COUPLER, HYDRAULIC TILT

REQUIREMENTS

Hose Kit

FEATURES & BENEFITS

- More flexibility with great working range: 90° tilting on both sides
- Unlock process (hydraulic) is designed to release only when the operator intends to do so, in a controlled and safe manner
- · Compact design with low build actuator height to improve breakout force and performance
- Oil feed through the actuator
- Actuator sealed and protected against damage
- High retention forces and robust design for toughest applications
- Also available with lifting hook (3 5 ton)

FOR E26, E27, E27Z, E34, E35Z, E50z, E55z AND E60, MACHINE TO BE EQUIPPED WITH AUX4 HYDRAULIC LINE FOR BEST **PERFORMANCE**

Description: The Bobcat Hydraulic Tilt Coupler allows you to change attachments hydraulically, rapidly and from the comfort and security of your cab. Coupler systems turn excavators into toolcarriers, switching between different buckets and attachments in a matter of seconds. It combines all the benefits of a quick coupler with a tilt actuator. So you can always use the right tool for the job, maximizing efficiency and productivity.

COUPLER, MECHANICAL

K.

REQUIREMENTS

Klac™ System

 Our Klac quick-attach systems are specially designed for Bobcat compact excavators and offer a host of benefits.

FEATURES & BENEFITS

- Dedicated compact coupler with automatic self-locking mechanism from the cab
- · Unlocking of the attachment is made with a lever provided
- · Easy bucket hook-with automatic centring.
- Wear compensation system to maximize lifetime.
- For the reversibility of your bucket, an adaptor bracket is available, allowing you to use your bucket as a shovel.

German System

- Locks mechanically with automatic adjustment for reliable connection.
- Long lifetime with little maintenance thanks to sealed locking system.
- Complete range of couplers and adapters for all attachment types.

Mechanical Pin Grabber

- Pin-on mount optimized for Bobcat excavators
- Lift eye facilitating transport of additional attachments around the jobsite
- Dedicated pick up dimensions for Bobcat attachments
- Dedicated release tool
- Design allows for reversed bucket pickup, enabling an even wider range of applications
- Built in safety features

Description: These manual couplers let you change attachments quickly, easily and safely. Coupler systems turn excavators into tool-carriers. You can switch between different buckets and attachments in a matter of minutes. So you can always use the right tool for the right job, maximising efficiency and productivity.

Coupler: No special requirement.

FLAIL MOWER, SELF-LEVELLING

REQUIREMENTS

Fixing Cap

MX Flail

Mower, Selflevelling

FEATURES & BENEFITS

- Can use the Flail Mower while driving the machine (except for machine E57W)
- Anti-shock, anti-cavitation and flow reducer
- Optimized for Bobcat machines
- Internal drainline
- Self-levelling feature for the simplicity of operation and maximum productivity
- Replaceable wear skids for long product life
- Knife and hammer options when available
- Replaceable cutting flails
- Direct power drive (no belts, chains or gearboxes) to provides optimum balance between torque and RPM
- Double skin flail head
- Roller to copy the surface

SL Flail Mower: The carrier needs to be equipped with a closed cabin.

Description: Shred vegetation on any terrain, inluding roadways or ditches, or clear out shrub and long grass from forgotten areas. With the help of the excavator's arm the flail mower can reach where other mowers could not (pylons, solar panels or beyond fences).

HYDRAULIC CLAMP

Description: Use this handy hydraulic clamp with a trenching bucket or 3-tine grapple to get a good grip on broken concrete, tree stumps and other oddly shaped objects. When not needed, the clamp can be completely retracted onto the inside of the dipperstick and will not interfere with normal digging activities.

| TECHNICAL SPECIFICATIONS | | | | | | | | |
|--------------------------------------------------|----------------|------------------------|-----------------------|---------------------------|----------------|-------------------------|-----------------|------------------------------------|

BOBCAT DEPTH CHECK SYSTEM

The depth check system is a solution that uses three sensors placed strategically on the machine to accurately achieve or sustain the desired grade depth from the cabin.

The depth check system integrates with the Bobcat panels and displays, which offers simple operation and eliminates the need for an add-on display monitor inside the excavator cab.

This simple, durable kit is wired, so job conditions or wireless signal loss never interfere with your digging accuracy, while also reducing lag time with no batteries to replace.

MAIN BENEFITS OF THE SYSTEM

▶ INCREASED PRODUCTIVITY

Depth check can expedite trenching, reduce labor, and improve the quality of the excavation. It will help operators dig quicker, with less effort, and greater precision. Minimize the need for jumping in and out of the trench to check the grade, with a grade stick.

VISIBILITY & COMMUNICATION

Being able to analyze the digging depth and preciseness directly from the panel allows for increased visibility of the grading. It avoids the need to do a manual check with a tape measure or a "stick receiver". Perform tasks such as minimal cover jobs, or grade and slope sustention.

EASE OF USE

After installing this improved system, compatible with E32–E88 excavators, on the machine, the operator can set the required settings to his preferences, for a more efficient grading job. The settings allow the operator to easily monitor the actions of the machine's arm, boom, and bucket.

RECOMMENDED APPLICATION EXAMPLES

LANDSCAPTING

Perform tasks alone, that usually require manual checking – digging basements or pools, or site preparation for a terrace. Saving trips in and out of the cab will increase your time efficiency, allowing operator to get the job done faster.

▶ AGRICULTURE

Place drainage ditches and drain fields with increased efficiency. The wired system allows the operator to maintain the grade, and not worry about over- or under digging. Aids to analyse the depth and precision of the grade.

▶ CONSTRUCTION

You can easily trench utility lines, install sewer lines, and do site preparation for footings or pads from the comfort of your cab.

PRODUCT FEATURES

- Uses sensors to communicate with the customer's machine panel to track the bucket's teeth.
- The system allows the operator to analyze the depth and precision of their grade.
- The three sensors on the arm, boom, and the attachment, aids to monitor and control the digging operation as well as detect the desired digging depth against the benchmark.
- Integrated instrumental panel displays current and desired depths.
- Audible digging depth indication slow chirping when approaching the target, constant chirp at target, fast chirping when beyond target.
- Wired system reduces lag time with no batteries to replace, no interference affecting digging accuracy no matter the working conditions.
- Compatible with the Laser Receiver for additional precision.

The Bobcat Depth Check System kit contains:

- 3 sensors with installation instructions.
- · Controller.
- Harnesses, and harness for controller.
- Calibration rods.
- Mounting hardware and installation instructions.

CR600 Receiver

LASER OPTIONS

Laser options are available for additional precision. The laser receiver CR600 is compatible with the Depth Check kit. Laser receiver CR600 offers a cost-free solution (included in 7275232 kit) with quick installation thanks to its integrated magnetic mount, with a minimal 'dead-band' and without arm angle control.

LR50 LASER DISPLAY RECEIVER

HIGH ACCURACY WITH THE BOBCAT GRADE LASERS

▶ GL722 GRADE LASER

For efficiency and productivity, change and control the functions of the transmitter with the remote, from the comfort of your cab. The Automatic Axis Alignment eliminates the need to manually align the laser to your grade hub, giving you an accurate result each time.

▶ GL422N GRADE LASER

Rugged and cost-effective laser for leveling and grading, or jobs that require vertical alignment. Even in harsh jobsite conditions it provides a consistent and accurate performance.

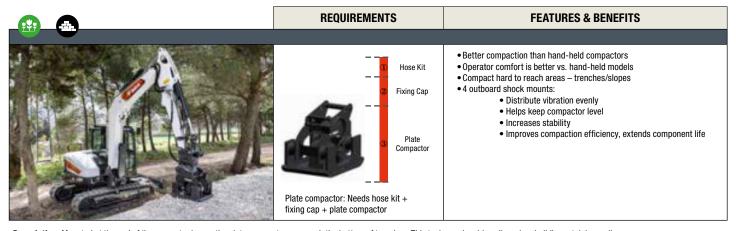

The Automatic Grade Match eliminates time consuming and error prone calculation by measuring and displaying the current grade over unknown ground.

D LR50 LASER DISPLAY RECEIVER

Use the LR50 for worry-free grading, levelling, and excavation. The built-in blade tilt and plumb indicator is installed to increase your accuracy and producivity during operation.

Bobcat One Tough Animal

PLATE COMPACTOR

Description: Mounted at the end of the excavator boom, the plate compactor can reach the bottom of trenches. This tool can also drive piles when building retaining walls. This attachment allows you to quickly handle a project requiring compaction with no need for a laborer in the trench with a hand-operated compactor. It is an alternative to a walk behind unit or remote-controlled roller compactors.

ROTARY GRINDER

Description: The rotary grinder is a powerful attachment that consists of a double drum, driven by a completely integrated high torque hydraulic motor. Due to its design, it permits on the one hand a very precise removal of material, without damaging adjacent structures and on the other hand it can demolish complete structures and dig trenches in rocky ground or prepare asphalt or concrete surfaces for reparation.

CHARGE UP YOUR ELECTRIC EXCAVATORS WITH THIS SUPERCHARGER

- **▶** Designed to accommodate different battery types.
- For ease of use, it can be used as a portable power supply.
- Ideal for machines that need fast charging and increased battery life cycle.

SUPERCHARGER

REQUIREMENTS FEATURES & BENEFITS

- $\bullet \mbox{Stainless steel housing prevents corrosion in outdoor applications } \\$

- Ventilation ports to avoid overheating
 Microprocessor for various device connections and battery types
 Memory accommodates 1000 charging cycles and secures them, giving a complete analysis of the battery behavior and the respective usage
- · Adjustments can be made in the programmable display battery type, charging profile and battery capacity
- Portable and compact design makes moving it around the jobsites effortless

Description: An electric charger optimized for your new E10e and E19e. Thanks to the precise engineering design with our Bobcat electric excavators in mind, this charger offers optimized charge time while meeting all the machines' requirements for increased battery life.

COMPACT LOADERS

BOBCAT LOADER + BOB-TACHTM - A WINNING COMBINATION

Thanks to more than 75 hard-working, job-matched attachments, your Bobcat loader is truly cost effective. Each attachment is designed and manufactured to fit perfectly with the base machine for optimum job performance, dependability and durability. That's real value. That's the Bobcat Attachment Advantage.

The Bob-Tach™ system for fast, secure attachment changes

Bobcat attachments are secured using the Bob-Tach coupler – copied by many, never equalled.

The Bob-Tach™ system for fast, secure attachment changes. Thanks to its unique and simple design, you can replace a bucket with pallet forks, a landscape rake, a backhoe, or a sweeper within minutes using the Bob-Tach™ mounting system.

The Power Bob-Tach is a hydraulic version enabling you to connect and disconnect an attachment from the comfort of your cab.

Change attachments while sitting comfortably

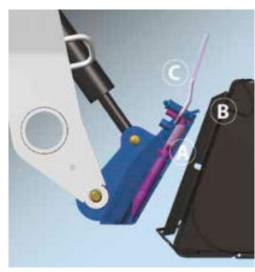

The Bob-Tach™ mounting system allows you to change attachments quickly while working on-site. And, with the optional Power Bob-Tach™, you can change non-hydraulic attachments without even leaving the cab. Activated by a switch in the centre panel, the Power Bob-Tach™ levers can be raised and lowered hydraulically, increasing the versatility and productivity of all Bobcat compact loaders.

Bob-Tach[™] frame (A) moves into attachment flange (B); handle (C) pushes down easily, pressing wedge (D) through frame and attachment hole for solid connection.

Exclusive Bob-Tach™ System (BT)

QUICK COUPLERS (WITH PRESSURE RELEASE)

Quick couplers (with pressure release)

This unique design ensures that hydraulic attachment changes go quickly and smoothly. But trapped line pressure can make attachment changes anything but quick.

So Bobcat loaders come with a handy feature to release trapped pressure. By simply pushing the coupler inward, the hydraulic oil is released through a return line back into the machine. The result: clean, quick attachment changes, time after time.

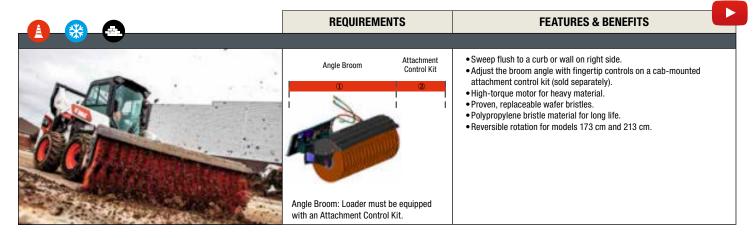

INCREASE YOUR PRODUCTIVITY UP TO 15-20% WITH THE SUPER FLOW 8X LOADERS

- ▶ The Super Flow option increases hydraulic efficiency and auxiliary performance to 159 I/min @ 28 MPa
- This new flow technology will change your loader into the most powerful carrier
- **▶** Super Flow increases your performance in forestry, snow removal, and road maintenance applications.
- ▶ The 8X loaders have a new 5-coupler block allowing the use of larger ¾" quick coupler connectors for increased efficiency and performance
- Try now with our forestry cutters and self-levelling planers!

ANGLE BROOM

Description: Dirt, dried mud, light snow and other debris are quickly and efficiently swept away with this hydraulically driven attachment. Whether you're sweeping driveways, farmyards or warehouses, you can depend on the angle broom to get the job done right.

AUGER

REQUIREMENTS

Mouting Frame

Drive Units

Bits

FEATURES & BENEFITS

- A smaller drive housing allows the entire drive unit to follow the bit into the hole, adding 30 cm more dig depth than a standard drive unit.

 • An efficient design and modified displacement give these units plenty of
- torque.
- torque.

 Round and combination shaft augers available.

 Wide range of auger bits widths available to best meet your hole requirements.

 Choose from Standard Duty, Heavy Duty and Rock Duty bits to adequately penetrate the ground conditions.

 Extra bits extension are available for increased hole depth.

Description: Speed and perfect vertical accuracy are what you get with this high-torque, heavy-duty hydraulic auger. Its unique "knuckle-joint" design allows it to hang perfectly vertical, on flat or uneven terrain. The entire drive unit follows the bit into the hole, adding 30 cm more dig depth than a standard unit. This is the ideal tool for drilling holes for posts, piers, poles and trees in all kinds of

Auger: Needs Mounting Frame + Drive Unit

soil conditions. Choose from 3 types of bits to best suit the ground conditions (standard, heavy duty and rock) and a multitude of widths to best meet your hole width requirement.

BOBCAT OFFERS A WIDE RANGE OF AUGER
BITS WITH A DIAMETER FROM 15 CM UP
TO 76 CM WIDE. CHOOSE YOUR AUGER
BIT THAT BEST MEETS YOUR GROUND
CONDITION AND HOLE WIDTH AND
DEPTH REQUIREMENT. BOBCAT OFFERS
STANDARD DUTY, HEAVY DUTY AND ROCK
QUALITY BITS.

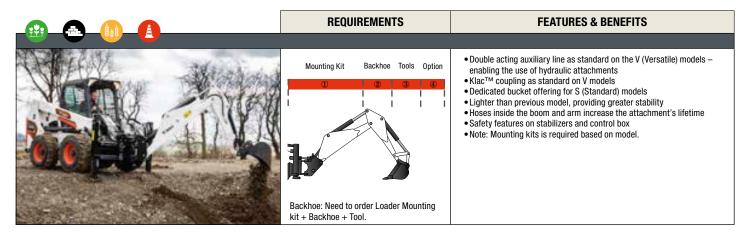

CONVERT YOUR LOADER INTO A POWERFUL EXCAVATOR WITH OUR NEW GENERATION OF BACKHOE ATTACHMENTS

- Double acting auxiliary line as standard on the V (Versatile) models enabling the use of hydraulic attachments
- ► KlacTM coupling as standard on V models
- Dedicated bucket offering for S (Standard) models
- Lighter than previous model, providing greater stability
- Hoses inside the boom and arm to extend the attachment's lifetime
- Safety features on stabilizers and control box

Learn more on page 82.

BACKHOE

Description: Transform your Bobcat loader into a powerful, efficient, and versatile excavator with a Bobcat backhoe. This attachment makes your excavating loader the perfect partner for landscaping and nursery work, sewage systems and septic tanks, water and power lines and many other jobs.

BALE FORK

REQUIREMENTS

FEATURES & BENEFITS

• In between spacing can be easily adjusted.

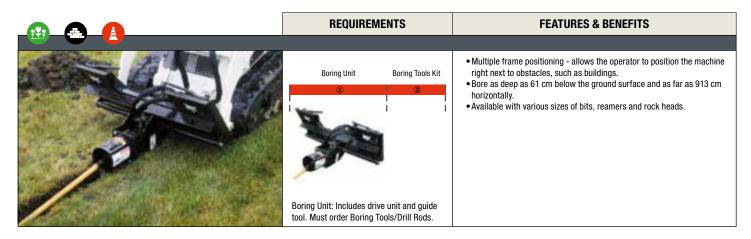

Bale Fork: Need Mounting Frame and Forks.

Description: The pair of small diameter forks offer benefits over a single fork. They stabilise the load by balancing round bales and securing uneven bales.

BORING UNIT

Description: Save the time and expense of tearing up sidewalks, driveways and other paved areas to install irrigation lines or power and communication cables. The hydraulically powered attachment bores horizontally to accommodate pipe or cable up to 10 cm in diameter. After boring, it can pull the pipe or cable through the hole.

BREAKER

REQUIREMENTS **FEATURES & BENEFITS**

- reducing noise and vibration to deliver operator comfort without sacrificing performance. Silenced standard for all breaker models.

 • Diaphragm-type accumulators reduce maintenance by preventing slow
- leaks.
- Long-life breakers designed for all demolition jobs with minimal
- The innovative steel ring feature allows retaining the tool bushing, protecting the grease access and provides a quick tool change solution.

 Designed for minimum downtime and with few service parts to reduce
- operation cost and improve overall lifetime of the attachment.
- Bobcat breakers produce low recoil and minimal hydraulic pressure spike to their carriers.

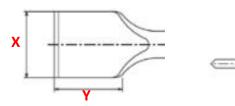

Breaker includes: Nail Point, fixing cap bolts, gauge tool and hose protector. Special Application Kit must be installed on the machine.

Description: Bobcat breakers offer high performance, low maintenance, and are easy to use. All breakers feature a frame with a cylindrical design, providing improved access to jobs in confined areas. All breakers have a silenced housing as standard.

BRUSHCAT™ ROTARY CUTTER

REQUIREMENTS

FEATURES & BENEFITS

- Double-edge blade provides increased blade life by bidirectional cutter rotation (achieved by switching the hydraulic hoses at the drive motor)
- Direct hydraulic drive dampens impact loads and eliminates the need for shear pins or drive clutches.
- Front disks allow to better traverse uneven terrain while reducing operator fatigue.
- Floation linkage allows the deck to float over ground contours, keeping it in contact with the surface for optimum performance.
- Floating frame allows oscillation +/- 10 degrees
- Patented blade shutoff device stops blade rotation when rotary cutter is raised off the ground.

Description: Handle tough brush clearing and landscaping applications easily with the Brushcat[™] rotary cutter. This attachment easily cuts through the toughest grass and brush while mulching small branches and saplings up to 7.6 cm in diameter. This tool is ideal for clearing lakefront property, construction sites, power line access roads, trails and ditches.

BRUSH SAW

REQUIREMENTS FEATURES & BENEFITS

- $\bullet \ \mbox{High-torque, low-speed motor increases efficiency while decreasing}$ stalling.
- Manual 3-position boom angle.
- Left side discharge.
 Steel deflector shields protect operator and loader from flying debris.
- \bullet Cut slightly below ground level to minimise stumps.
- \bullet It has the ability to cut beyond mounting frame of saw when angled to the left.
- Equipped with a 70 cm high-tensile steel blade

Note: The use of the Brush Saw requires a special application kit to be installed on the machine.

Description: The Bobcat brush saw attachment is a quick, convenient way to remove unwanted brush. It's ideal for cutting firebreaks, clearing pastures and grasslands, and cleaning road and utility line right-of-ways. The brush saw can cut slightly below ground level to minimise stumps often left by tree shears. The steel deflector shields protect the operator and loader from flying debris.

BUCKET, COMBINATION

REQUIREMENTS FEATURES & BENEFITS

- \bullet Ideal for dozing, grappling, levelling, digging, loading and dumping.
- Built with heavy-duty cutting edges and protected cylinders for long life.

Combination Bucket: It is recommended to use the port relief valve 6684646 for S450/T450 and larger

Description: Dozing, grappling, levelling, digging, loading and dumping. This multi-purpose bucket does it all. Use it on demolition, construction, landscaping and municipal jobs. It's designed to provide optimum digging force and the interlocking serrated grapple edges hold objects securely.

BUCKET (CI), CONSTRUCTION / INDUSTRIAL

Description: The strongest of all Bobcat buckets. Ideal for everything from tough digging to material handling. Construction / industrial buckets offer good cutting edge visibility and excellent bucket breakout force for better digging and easier bucket filling. Heavy-duty construction / industrial buckets offer even more features required for severe-duty use.

BUCKET, DIRT

REQUIREMENTS FEATURES & BENEFITS

- Flat back assures a secure attaching area for the Bob-Tach™ mounting system
- Low heel makes cutting grade and backdragging easier.
- Replaceable cutting edges.
- Side cutting edges give better performance, increase strength and extend bucket life.

Dirt Buckets: Have predrilled holes to accept bolt-on cutting edge or bolt-on

Description: Ideal for everything from digging to material handling. Dirt buckets offer good cutting edge visibility and excellent bucket breakout force for better digging and easier bucket filling.

BUCKET, FERTILISER AND GRAIN

REQUIREMENTS FEATURES & BENEFITS

- Large capacities
- More roll-back range. The greater roll-back allows granular materials to be easily held in the bucket by minimising spillage over the front edge.

Fertiliser & Grain Buckets: Have predrilled holes to accept bolt-on cutting edge.

Description: Fertiliser buckets have large capacities and more roll-back range. The greater roll-back allows granular materials to be easily held in the bucket by minimising spillage over the front edge. Applications include fertiliser and grain handling.

BUCKET (GP), GENERAL PURPOSE

REQUIREMENTS

FEATURES & BENEFITS

- Round back design enhances bucket loading and cleanout
- Flat back assures a secure attaching area for the Bob-Tach™ mounting system
- Low heel makes cutting grade and backdragging easier
- Replaceable cutting edges
- Side cutting edges give better performance, increase strength and extend bucket life

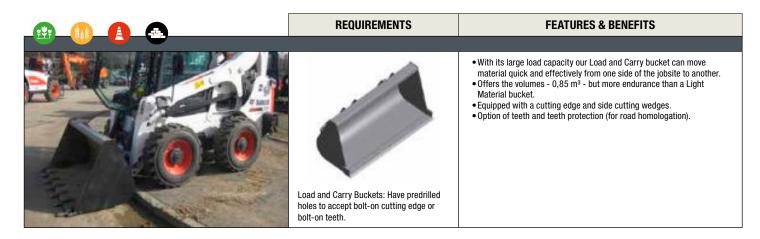

Description: General purpose buckets have a longer bottom than the dirt style. They offer excellent cutting edge visibility and good breakout force. General purpose buckets are ideal for light duty and medium duty grading and levelling applications as well as material handling.

BUCKET (LP), LOW PROFILE

Low Profile Buckets: Have predrilled holes to accept bolt-on cutting edge or bolt-on teeth.

Good cutting edge visibility.
 Excellent bucket breakout force for better digging and easier bucket filling.

Description: These buckets have a longer bottom than the construction/industrial style. They offer excellent cutting edge visibility and good bucket breakout force. Low Profile buckets are ideal for grading and levelling applications as well as material handling.

BUCKET, SNOW AND LIGHT MATERIAL

REQUIREMENTS FI

FEATURES & BENEFITS

- \bullet Large capacity for loading and handling various light materials such as snow and mulch.
- High backs to help with pushing snow.
- Straight sides to penetrate snow and mulch piles.

OUR LIGHT MATERIAL BUCKETS ARE APPROVED ON LOADERS WITH THE MAXIMUM MATERIAL DENSITY OF 800 KG/M³

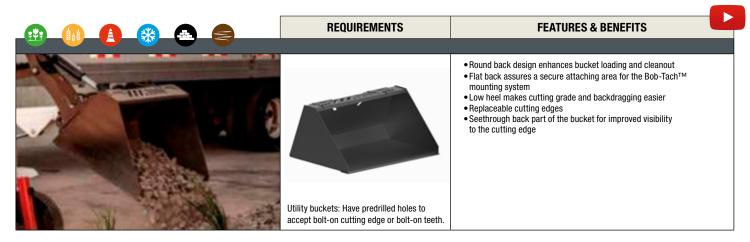

Description: Because snow is relatively light compared to soil, gravel or other construction materials, the capacity of the snow bucket is much greater than those usually used in construction. The back of the snow bucket is also higher, which lets you push more snow without having it flow over the top. Spill guards are available, they are meant to protect the operator, door, tilt cylinders and the BobTach pivot area from debris that spills over the back of the bucket.

CONCRETE MIXER

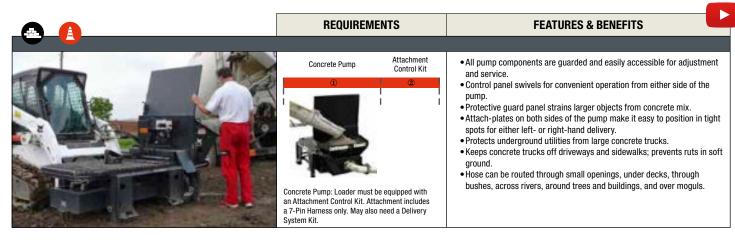

Description: Turn your Bobcat loader into an efficient concrete mixer with this rugged, cost-effective attachment. The Bobcat concrete mixer attachment lets you mix, transport and dump concrete much quicker than a traditional stand-alone mixer and wheelbarrow. The attachments compact size makes it perfect for sidewalks, driveways, finish work, and footings and floors of small buildings. It's great for working in hard-to-reach or limited-access areas.

CONCRETE PUMP

Description: This powerful attachment puts concrete right where you want it and is built to last. Pumps concrete up to 75 m horizontally and two stories vertically. The hose is easily routed through small openings, under decks, through bushes and around other common obstructions. It reduces damage to turf and underground utilities caused by using large concrete trucks.

DIGGER

REQUIREMENTS

FEATURES & BENEFITS

Its unique design and shape are ideal for:

- Digging in forward and reverse
- Making trenches
- Transplanting trees and shrubs
- Carrying plants balled and small trees
- Removing roots and shrubs
- Loosening hard-packed soil
- Removing rocks and stumps
- \bullet Three models with widths from 65 cm to 90 cm to best suit your needs \bullet Digging depth of 121 cm for optimum reach
- Maintenance free

Digger: No special requirement.

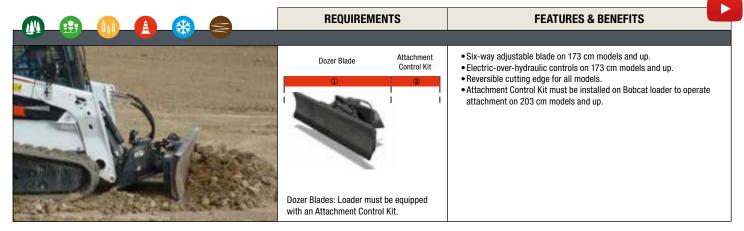

Description: The digger is ideal for nurseries and landscaping applications. Use this multiple-use attachment to dig, trench, remove rocks and stumps, transplant trees and shrubs, carry and plant balled and burlapped trees, as well as, loosen hard-packed soil.

DOZER BLADE

Description: Turn your loader into a mini crawler with the dozer blade. Expand the versatility of your compact tool carrier with the 6-way adjustable blade with electric-over-hydraulic controls and the reversible 3-piece cutting edge. The 6-way dozer blade can be angled plus or minus 30° degrees and oscillates plus or minus 10° for great flexibility under varying dozer conditions. Use this attachment to level, pile and grade loose dirt, gravel and sand; to backfill and shape landscape areas. This heavy duty tool is also ideal for construction applications.

FLAIL CUTTER

REQUIREMENTS

Flail Cutter: No special requirement.

- Variable speed displacement motor allows the flail cutter to be "tuned in" to your machine, depending on its hydraulic capacity. By varying the motor displacement to accept auxiliary hydraulic flows ranging from 64 to 151 l/min, the flail cutter can be operated on many different carriers.
- Floating linkage is standard on the flail cutter. This, along with the attachment's compact deck length, lets the unit follow the contour of the land regardless of the pitch or attitude of the carrier, permitting the cutter up to ten degrees of oscillation.
- Safety compliance The flail cutter complies with the SAE J1001 standard for industrial flail mowers. It is standard-equipped with an automatic shut-off device which allows approximately ten inches of vertical travel in the Bob-TachTM; mounting system before the flail cutter shuts down.
- Full width tapered rear roller provides greater turning ability during operation.
- Adjustable rear hatch allows operators to vary the size of discharged material, ranging from small, for mulching applications to coarse for high performance cutting.

Description: The flail cutter is ideal for cutting overgrowth on construction sites as well as alongside roads and sidewalks. It adjusts to follow ground contour.

FORESTRY CUTTER

REQUIREMENTS

Forestry Cutter: Forestry Kit components are required to operate the Forestry Cutter and provide operator and machine

Forestry Kit

FEATURES & BENEFITS

- Provides you a complete tree and brush management package.
- \bullet Cut higher trees and limbs down to size, grind trees from top to bottom, produce mulch.
- Spiral tooth pattern allows one tooth to engage at a time for smoother operation and less horsepower demand.
- Double-tipped carbide teeth efficiently rip through hard and soft woods, provide long life.
- Can operate below grade to process mulch into the soil.
- Pressure gauge is visible from the seat to help operator run the attachment at peak efficiency.
- The standard front gate can reduce front discharge of material and can promote longer processing into finer mulch.
- The Bobcat Forestry Applications Kit protects the operator and the machine.

Follow requirements according to carrier compatibility. Description: Take trees and underbrush from unsightly overgrowth to mulch in minutes with the Bobcat forestry cutter. The forestry cutter leaves a carpet of mulch behind when clearing trees and brush for pre/post disaster mitigation, utility line and road right-of-way maintenance, site preparation, orchard and vineyard maintenance. Use it to cut firebreaks,

protection.

WHY CHOOSE A BOBCAT FORESTRY CUTTER?

- Mulch a tree in minutes thanks to the 150 or 200 cm wide drums, as well as the variable torque for great productivity.
- ▶ These forestry cutters provide a high-level of precision. Surgically cut the selected tree only or create a path with great agility, and without damaging the surrounding vegetation.
- For increased safety, there is a special application kit that protects the operator and the machine.

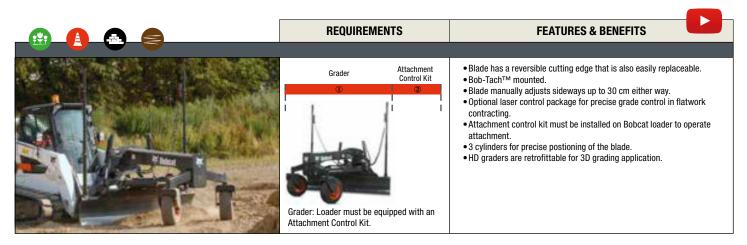

MULCH TREES IN MINUTES WITH THE FORESTRY CUTTER

- Perfect for any cutting job in a fragile environment thanks to the attachment's compact size and the machine's unmatched maneuverability
- All in one tool: Allows the operator to perform the job from start to finish mulching trees or dead wood into medium sized chips leaving the jobsite clean after the work is done
- ▶ The tungsten-carbide teeth guarantee a long product life with low operating cost
- Ideal for land clearing, fire breaks, land preparation and park management

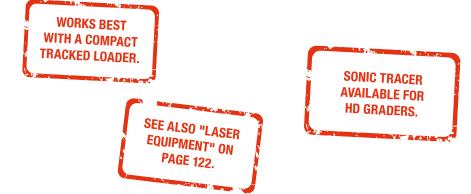

GRADER

Description: Turn your Bobcat loader into a high-performance grading machine. The six-way hydraulically-controlled blade is easy to operate with switches located on steering levers. Optional laser control system offers more precise control and saves concrete, time and labor.

Grader 213 cm with Laser Equipment

- ① Laser Receiver LR410: PN 7436330 (Must order 2 Receivers.) Approved on Graders with S/N 6480-01631 & above
- 2 Laser Transmitters: Dual Slope: GL722 PN 6680073 / GL422N PN 7275232
- 3 Tripod: PN 6688806
- Laser Mounting Kit: PN 7436128 For 84"/213 cm Graders with S/N 6480-01631 & above. Includes poles and harnesses.
- Loader must be equipped with an Attachment Control Kit.
 In case of a non-HF machine, order this kit from Parts.
 7-pin Attachment Control Kit for G > K-series loaders: PN 6733142
 7-pin Attachment Control Kit for M-series loaders: PN 7128426
- @ 84" / 213 cm Grader PN 6906480

Grader 244 cm and 274 cm with Laser System

- ① Laser Receivers LR410: PN 7436330 (Must order 2 Receivers.)
- 2 Laser Mounting Kit: PN 7436129 (Includes poles and harnesses)
- 3 Laser Transmitters: Dual Slope: GL722 PN 6680073 / GL422N PN 7275232
- **4** Tripod: PN 6688806
- ⑤ 108" / 274 cm Grader: PN 7182060 or 96' / 244 cm Grader: PN 7160005
- © Loader must be equipped with an Attachment Control Kit.
 In case of a non-HF machine, order this kit from Parts.
 7-pin Attachment Control Kit for G > K-series loaders: PN 6733142
 7-pin Attachment Control Kit for M-series loaders: PN 7128426
- 7 Optional End-Wing Kit: PN 7177684

Grader 244 cm and 274 cm with Sonic Tracer

- ① 96' / 244 cm Grader: PN 7160005 or 108" / 274 cm Grader: PN 7182060
- 2 Mounting Hardware: PN 7211624
- 3 Sonic Tracer Package: PN 7023454. Includes 1 sonic tracer, 1 rotation sensor, 2 angle sensors
- Optional End-Wing Kit: PN 7177684

SAVE TIME, LABOR & MONEY WITH THE BOBCAT GRADER

- ▶ High grading and precision capabilities through 6-way hydraulically controlled blade
- For increased productivity, a standard side shift is installed, and can be controlled from the cab, as well as the blade.
- Optional laser equipment or sonic tracers for optimum precise grade control and dual slope accuracy
- Cost efficiency: Compact, maneuverable and leaves no waste material

GRAPPLE, FARM – UTILITY ON BUCKET

REQUIREMENTS

FEATURES & BENEFITS

- Move hard to handle materials easily.
- Hydraulically controlled grapple is easy to operate.
- Exclusive Bob-Tach™ mounting system lets you change to another attachment quickly.
- Grapple design allows you to get the forks or bucket close to fences or the sides of walls.

Farm/Utility Grapple: To be attached on bucket. It is recommended to use a port relief valve

Description: This is the easy way to handle loose hay, bedding and manure on the farm and other sites. Use the utility bucket by itself or add the hydraulic grapple for more gripping power.

GRAPPLE, FARM – UTILITY ON FORK

REQUIREMENTS FEATURES & BENEFITS

- Move hard to handle materials easily.Hydraulically controlled grapple is easy to operate.
- Exclusive Bob-Tach™ mounting system lets you change to another attachment quickly.
- Grapple design allows you to get the forks or bucket close to fences or the sides of walls

Description: This is the easy way to handle loose hay, bedding and manure on the farm and other sites. Use the utility fork by itself or add the hydraulic grapple for more gripping power.

GRAPPLE, INDUSTRIAL

REQUIREMENTS

FEATURES & BENEFITS

- \bullet Move hard to handle materials easily.
- Powerful independant grapples (2) secure uneven loads.
- Hydraulically controlled grapple is easy to operate.
- · Handles bulky, uneven loads securely.

Description: Built tough for reliability and endurance, the industrial bucket and fork with grapple will easily handle scrap, waste, brush and other hard-to-manage materials.

GRAPPLE, ROOT

REQUIREMENTS FEATURES & BENEFITS

- Curved tooth design permits material to be picked up without driving teeth into the ground and allows dirt to fall between teeth, leaving dirt
- \bullet Fully enclosed mounting frame extends wear life by minimizing flexing in frame area.
- Inertia-welded cylinder ends a Bobcat exclusive permit strong, smooth, durable grapple operation by improving hydraulic cushioning at the end of the stroke.
- Protected hydraulic hoses limit damage to hoses from debris.

Root Grapple: It is recommended to use a port relief valve.

Description: Built tough for reliability and endurance, the root grapple easily handle scrap, waste, brush and other hard-to-manage materials.

LANDPLANE

REQUIREMENTS

FEATURES & BENEFITS

- Can be used like a bucket to transport material on site.
- Peels and removes sod.
- Scarifier breaks up hard ground.
- Sorts unwanted debris from soil.
- Pulverises soil clods.
- Aerates soil for seeding and sodding.
 Bob-Tach™ mounted.
- Bidirectional operation.
- Bidirectional scarifier.
- Removable screen.

Landplane: Includes expanded metal grate, scarifier assembly, teeth and respective hardware.

Description: A landscaping must. It grades and levels in both forward and reverse and peels and removes sod. The deluxe landplane includes a bidirectional scarifier and removable screen to pulverise soil clods, aerates and sorts debris from soil.

TACKLE MORE JOBS WITH THE 3D GRADING SYSTEMS

- The 3D system enables its operator to work in any environment with a flexible system either based on GNSS or UTS signals
- It enables its operator to create a perfect surface in a single pass, thus reducing fuel and labour costs
- A 3D grader might be able to tackle more jobs than the 2D version, but it is also a bigger investment with additional infrastructure needed (people, engineering design, base stations)
- However, for simple grading the 2D Grade control system might just be the perfect solution for you. It comes with a smaller investment, and shorter learning curve

HIGH ACCURACY WITH THE BOBCAT GRADE LASER TRANSMITTER AND RECEIVER

LR410 LASER RECEIVER

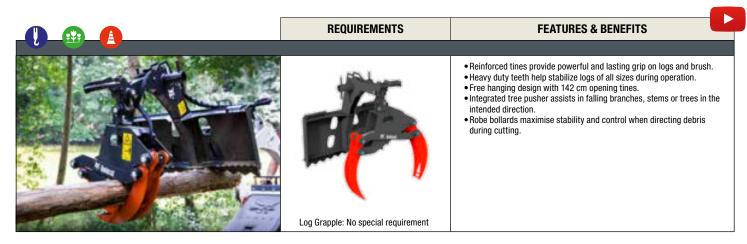

- The Automatic Lift Control System will continually provide the maximum accuracy in any grading task.
- Operate worry-free on a jobsite with the anti-strobe feature, eliminating equipment interference.
- This receiver is fully weatherproof for maximum productivity in any weather conditions.

D GL722 GRADE LASER

- Easy access points, and the intuitive controls enables quick and efficient control changes from the comfort of the cab, increasing operator productivity.
- The Automatic Axis Alignment eliminates the need to manually align the laser to your grade hub, giving you an accurate result each time.

LOG GRAPPLE

Description: Meet the challenging demands of landscaping and municipality jobsites with our new log grapple! Loading logs onto trailers or transporting material out of your yard has never been easier. This free-hanging log grapple attachment has the brute force and agility to lift and move heavy logs and brush - even on tight worksites or properties.

MIXING BUCKET

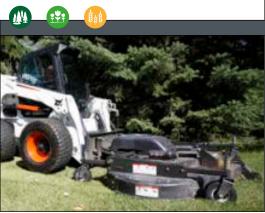

Description: This rugged, cost-effective attachment lets you mix, transport and pour concrete much quicker than a stand alone mixer. Its compact size makes it ideal for sidewalks, driveways, finish work, footings and floors of small buildings and hard-to-reach or limited access areas.

MOWER

REQUIREMENTS

FEATURES & BENEFITS

- \bullet Three partially overlapping blades for clean cutting with no skips.
- Direct hydraulic motor drive.
- Industry standard cutting blades elevate grass for better mulching capability.
- Adjustable cutting height from 51 to 140 mm in 13 mm increments.
- Unique attachment frame allows mower to oscillate independently of loader.
- Rear discharge disperses grass clippings under the carrier, away from buildings, trees and fences.
- Patented blade shutoff device stops blade rotation when mower is raised off the ground.
- Anti-scalping wheel allows operator to traverse uneven terrain without scalping the surface.

Description: Ideal for rough-cut applications, including road ditch right-of-way, golf course roughs and large acreage mowing. The mower has three partially overlapping blades that cut clean with no skips. It eliminates driving over the grass before cutting, and provides excellent visibility of the work area.

WHICH DRUM TO USE

STANDARD DRUM:

Tackles most jobs, a perfect balance between speed and performance.

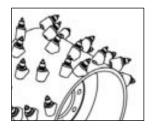

SLOT CUT DRUM:

Cuts asphalt in a thin line, preparing it for trenching, laying cables, or small reparations.

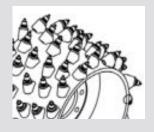

▶ ALL-PURPOSE DRUM:

Engineered for smoother finish result in multiple applications.

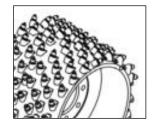

▶ FAST CUT DRUM:

Mainly known for its speed, leaves a rough surface.

▶ SMOOTH CUT DRUM:

Thanks to the higher number of teeth, it mills asphalt or concrete with ease, leaving a smooth surface behind.

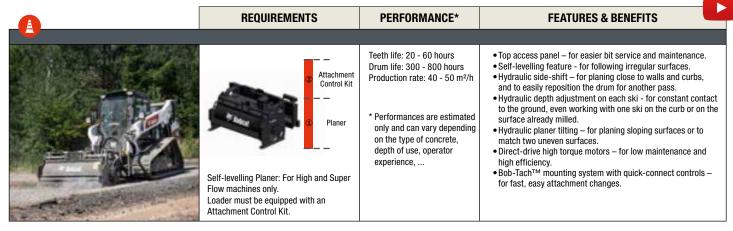

SURFACE DRUM:

Highest density of bits designed for removing paint from roads.

PLANER, SELF-LEVELLING

Description: Equipped with direct-drive, high-torque hydraulic motor. These low maintenance attachments efficiently mill asphalt or concrete. Planers feature hydraulic side-shift, hydraulic independent ski depth control and hydraulic tilting. Self-levelling ski. Make precise adjustments with fingertip controls. Operate with Super Flow technology for increased operation productivity on the jobsite.

DESIGNED TO SPRAY HIGH PRESSURE WATER ON ROADS OR ANY KIND OF SURFACE

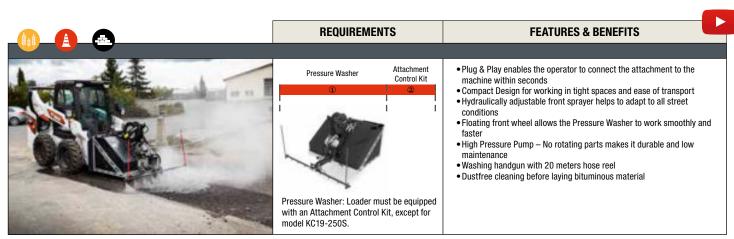

- Plug&Play connect and start to work for peace of mind
- Compact Design for maximum efficiency and easy transport
- Hydraulically adjustable front sprayer to adapt to all street conditions
- ► Floating front wheel (M/L) allows the pressure washer to work smoothly and quicker
- Easy to use and clean gets the job done quickly and safely with consistent results
- ▶ HPW (High Pressure Pump) no rotating parts makes it durable and low maintenance
- Washing handgun and 20-meter hose reel easy switch from front sprayer to washing handgun which makes cleaning apartment entrances, corners, statues, machines, cars, benches, signs, and all tight spaces effective and easy

PRESSURE WASHER

Description: The Bobcat Pressure Washer is a versatile attachment that can be used to clean and sanitize streets (model 220L is not suitable for sanitization needs), remove graffitis and even for railroad, bridge or tunnel maintenance. It's dustfree design enables the attachment to be used when laying asphalt, providing a clean surface for bituminous material laying. Designed to spray high pressured water on roads or any kind of surface that needs to be cleaned. Washing handgun with 20 meters hose reel makes cleaning effective and easy.

REAR STABILIZERS

Description: Increase your auger, backhoe or tree spade performance in a wide range of jobs with a set of frame-mounted rear stabilizers. Rear stabilizers improve performance by transferring the weight of the loader to the auger, backhoe or tree spade where it's needed for better digging capability. Rear stabilizers also assist in levelling the loader on uneven terrain. Rear stabilizers are available for most Bobcat loaders and can be quickly mounted and removed.

CONTROLLING THE MACHINE WITH THE REMOTE CONTROL KIT

- Thanks to the unique Plug and Play feature, this easily portable industrial remote control solution that can be interchanged between carriers in less than a minute
- By controlling the machine from the outside, the operator has a full visibility on the attachment making it even more versatile in certain applications. It allows easier communication at the jobsite, as it allows the operator to walk around, and manage his surroundings better
- The remote control distances the operator from dust, noise, vibrations or jobsites that require special safety precautions
- Work can be done faster and with higher precision, while it can also reduce the workforce needed (no more need of a support operator)

ROTARY GRINDER

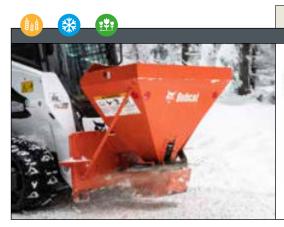

Description: The rotary grinder is a powerful attachment that consists of a double drum, driven by a completely integrated high-torque hydraulic motor. Due to its design, it permits on the one hand a very precise removal of material, without damaging adjacent structures and on the other hand it can demolish complete structures and dig trenches in rocky ground or prepare asphalt or concrete surfaces for reparation.

SALT & SAND SPREADER

REQUIREMENTS

FEATURES & BENEFITS

- •Three gates allow you spread up to 180° and up to 8 m wide.
- Self-loading from a stockpile like a normal bucket with a capacity of 0.33 m³
- An agitator is located in the hopper to facilitate the flow of caked material.
- Large chunks of sand and salt are filtered through the screen at the top
 of the hopper for even, consistent flow.
- A cab control allows you to regulate the spinner wheel rpm directly from the operator's seat.

Description: Ideal for spreading in confined areas such as parking lots and pedestrian zones where larger equipment cannot be used. Also excellent for spreading fertiliser and seed.

| Sand Cleaner finishing blade | 7282339 | 60 | Removes the machine track marks for a nice finish. | |

The SC200 is approved for wheeled Skid-Steer Loaders from B3YZ00214 and above. It is possible to retrofit previous units by the step replacement.

KEEP IT CLEAN WITH THE BOBCAT SAND CLEANER

- Collect small debris (cigarette stubs, bottle caps, broken glass, ...) and ensure short cycle time
- High productivity for great value: Up to 15 000 m²/h and the solution package is half the cost of a dedicated machine
- Use a Bobcat Root Grapple to pick up large material and to get access to difficult areas
- Ideal for public beach and private resort cleaning, playground, sports fields (Volley ball, beach soccer, ...) and race tracks maintenance, farm terrains and in the recycling/sorting industry

SCARIFIER

REQUIREMENTS **FEATURES & BENEFITS**

- Adjustable depth skids for pre-setting digging depth up to 15 cm deep.
- Prepares hard packed ground for digging or landscaping
- Rips light asphalt for removal
- Standard five-tooth unit with additional teeth available.
- Bob-Tach mounted.

Scarifier: Includes 2 Depth Guides and 5 teeth.

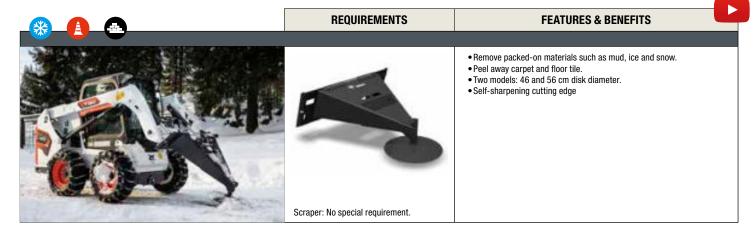

Description: Has the power to rip apart hard packed ground and prepare for digging or landscaping. The front scarifier has adjustable depth skids for presetting digging depth.

SEEDER

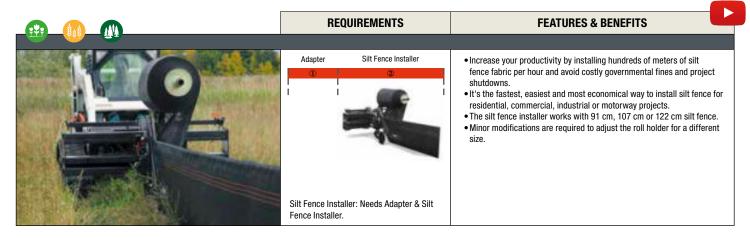

Description: Acurate seed placement and adjustable metering. Unlike broadcast seeders, the Bobcat seeder places the seed with the proper spacing and at precisely the right depth for better germination. It also eliminates broadcasting seed into unwanted areas. With a production rate of more than two acres per hour, the seeder is efficient and cost-effective.

SNOW BLADE

REQUIREMENTS

FEATURES & BENEFITS

Snow Blade: Includes hydraulic angle.

- \bullet Snow blades angle 30 degrees to either side, using powerful hydraulic cylinders, to help move snow where you want it
- $\bullet\,\mbox{The blade}$ angle is adjusted from the cab using fingertip controls
- \bullet Moldboard has spring trip for component protection in case of hitting a side walk or large stone
- Adjustable depth shoes are standard equipment
- High visibility masts provided to locate blade corners for better visibility of the blade position
- Strong, high-carbon steel cutting edge for long life
- Optional rubber cutting edge to protect pavement surfaces available through Bobcat Parts for 5- to 8-foot models
- Optional end wing kit turns Bobcat snow blades into snow pushers (end wing kit available for 7-foot and 8-foot models only)

 • Quick loader hook-up with the exclusive Bob-Tach™ mounting system

Description: An excellent way to quickly remove light or moderate snow from sidewalks and driveways. Moldboard angles right or left up to 30°. High visibility masts help locate blade corners.

SNOW BLOWER

REQUIREMENTS

FEATURES & BENEFITS

- Redesigned, rounded intake minimizes clogging and improves snow flow.
- Aggressive auger teeth easily break up and tear through hard-packed snow and ice.
- Reversible and replaceable wear edge bites into hard ice and packed snow and is designed for long life.
- Adjustable side-mounted and skid shoes allow operators to set the cleaning depth to match the jobsite.
- The truck loading chute allows the snowblower to place snow high in a truck box for easier removal and hauling.

Snow Blower: Includes a hydraulic motor package. Loader must be equipped with a 7-pin Attachment Control Kit.

Description: Clear snow off driveways, parking lots and sidewalks with our Bobcat snow blower. The snowblower attachments feature a new and extremely durable direct-drive, sprocket-style chute that operators can rotate to throw snow in virtually any direction and place it wherever the job requires - even hard-to-reach places.

MAXIMUM COST-SAVING AND PRODUCTIVITY GUARANTEED WITH THESE NEW GENERATION SNOW BLOWERS

- These new snow blowers come with a rounded profile, so the snow is rolled rather than pushed, moving the snow further and more easily
- They are meant to handle heavy duty tasks thanks to their reinforced design with the larger auger and added aggressive teeth
- Cutouts on the back envelope provide better visibility on the cutting edge for the operator
- **▶** Longer product life with the new hydraulically gear-driven chute
- ▶ Clear snow off driveways, parking lots, and sidewalks with ease!

SNOW PUSHER

REQUIREMENTS

FEATURES & BENEFITS

- \bullet The open bottom and wide body deliver pure pushing power, for maximum snow removal speed and efficiency.
- Collect and push snow with ease and speed.
- Flotation and oscillation of the moldboard keep the snow pusher in contact with the ground without damaging equipment or property, allowing for snow removal over decorative and uneven surfaces.
- \bullet When removing snow on flat surfaces, or when clearing hard packed snow, the floatation feature can be locked into a rigid position.
- The cutting edge rear support provides added strength to the moldboard.
- \bullet Exterior gusseting reduces snow build up inside the boxed blade.
- \bullet It is ideal for clearing packing lots, driveways and building sites.

Description: Push snow with speed and efficiency from parking lots, driveways and building sites using the Bobcat Snow Pusher attachment. Available in 2.44 m and 3 m widths size matched to your

SNOW V-BLADE

REQUIREMENTS

Snow V-Blade

Attachment

Control Kit

FEATURES & BENEFITS

- $\bullet\,\mbox{V-Blade};$ clear a path through deep snow.
- Straight Blade: pile large amounts of snow.
- Scoop Blade: scoop, push or pile snow.
- 30° Left or Right Angle Blade: continuously push snow to either side of the loader.
- \bullet Fingertip adjustments of V-blade's five configurations.
- Multi-position frame allows blade to be raised or lowered to desired working height.
- Domed, adjustable skid shoes and trip springs provide operator and component protection.
- Optional rubber cutting edge kits available.

Snow V-Blade: Loader must be equipped with an Attachment Control Kit. When used on loader equipped with a 14-Pin

Attachment Control Kit, a 14-Pin Attachment T-Harness Kit is required.

Description: This versatile, hydraulically operated attachment offers five different blade configurations to help operators move snow fast. The blade has on-the-go fingertip control and angles 30° right or left to continuously push snow to either side of the loader, straight or scoop configuration to push large amounts of snow, or v-configuration to plow through the deepest snow.

SOD LAYER

Description: Whether laying sod is a normal part of your day-to-day operation or just an occasional chore, the Bobcat sod layer attachment can make the job go quicker and more efficiently. The sod layer attachment can carry and lay a roll of sod up to 1219 mm wide, making it ideal for larger landscaping jobs. And because it mounts to the front of a Bobcat loader, it's manoeuvrable enough for those smaller jobs where space restrictions are a concern.

COMPACT DESIGN DESIGNED FOR MAXIMUM EFFICIENCY AND EASY TRANSPORT

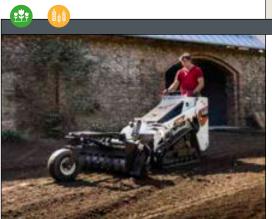

- ▶ Floating transverse tilt
- Hydraulic side shift and adjustable side plates guarantees ease of operation and perfect finish
- Offset feature allows laying asphalt without the machine passing over the spread material
- Pair it with one of our Bobcat Light Compactors for the full asphalt solution package!

SOIL CONDITIONER

Produces a perfect bed for seeding and sodding.

REQUIREMENTS

Soil Conditioner

Attachment

Control Kit

FEATURES & BENEFITS

- \bullet Produces a perfect bed for seeding or laying grass turf.
- Windrows and separates rocks and other debris.
- \bullet Impressively grades and levels topsoil with ease in floating or fixed mode per landscape requirement.
- Tears out old sod.
- Pulverizes dirt clumps.
- Forward and reverse raking action.
- Roller bar follows ground contours perfectly.
 Flip-up front bolster lets you get close to buildings and saves space $during\ transport.$
- Direct-drive motor eliminates chain and sprocket problems.
- Attachable end plates for box-blade effect.

with an Attachment Control Kit. Description: A versatile, cost-effective landscaping attachment. It saves time and labour when smoothing ruts, moving material or levelling mounds.

HF High Flow needed for operation

^{*} also compatible with High Flow

SONIC TRACER

REQUIREMENTS

FEATURES & BENEFITS

- The Sonic Tracer Package system comprises:
 - 1 sonic tracer
- 2 slope sensors
- 1 rotation sensor
- Available as an option for the 244 cm and 274 cm HD graders.

Sonic Tracer: To be installed on 244 cm and 274 cm Graders with ACD. Loader must be equipped with the Deluxe panel.

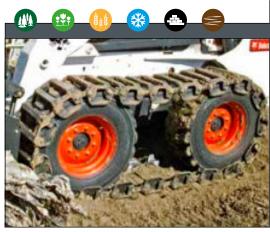

Description: The tracer emits a sonic signal to maintain a set distance or elevation from an object, surface or the ground. Installed on the blade of the grader, the sonic tracer allows it to be used to grade, level and backfill on a multiple slope terrain, when following a string line, kerb stone or gutter or even on a previous pass for a grade control.

STEEL TRACKS

REQUIREMENTS

Steel Tracks: Comes in sets of 2. On some

tracks/loader combination the installation

of additional components may be required.

If so these components are included in the

Description: Improve performance in rough, rocky, and muddy conditions with steel tracks. Designed for Bobcat loaders, steel tracks provide better flotation and reduced ground pressure when

FEATURES & BENEFITS

- Improves traction and flotation in soft, muddy and loose conditions.
- Open bar design utilises the tire to provide maximum traction and flotation.
- The special design protects the tire from wear and damage.
- There is a built-in system for length adjustments for optimum track adjustment to account for tire and track wear.
- After initial installation, steel tracks can be reinstalled easily in less than 30 minutes or removed in less than 10 minutes.

30 minutes or removed in less than 10 minutes.

IMPORTANT: Only pneumatic tires and tires with Superflex formula poly fill manufactured by Arnco are permitted for use inside steel tracks. Original Bobcat factory poly-filled tires meet this requirement. All other tyres including Bobcat Solid Tires (Twin Flex, Smooth Flex, Smooth Solid, etc.) are not approved. Please note that the use of non-approved tyres will void the loader and track warranties.

track package.

operating in tough environments. When working in soft and loose conditions, steel tracks improve traction.

STUMP GRINDER

REQUIREMENTS

Stump Grinder

Attachment

Control Kit

FEATURES & BENEFITS

- The work group is mounted at an angle of 90° to the operator for excellent visibility to the cutting area, giving the operator the same wide view as a pull-behind stump grinder.
- The swing cylinder design generates an impressive arc. This allows the operator to cut large stumps without repositioning.
- Rubber deflector shields and screening provide additional operator comfort and protection from wood chips.
- The unique valve design controls the swing circuit speed to prevent the cutting wheel from stalling in the cut.
- Diverse cutting heights gives better access for a variety of size stumps.

Stump Grinder: Loader must be equipped with an Attachment Control Kit.

Description: Grind tree stumps into mulch with the powerful action of the stump grinder attachment. Designed for maximum operating capability, the stump grinder mounts directly to the front of a carrier for easy manoeuvring in tight areas and positioning exactly where grinding action is needed. Mounted at a 90-degree angle to the operator, the stump grinder offers increased visibility to the cutting area, giving the operator the same wide view as with any pull-behind grinder. The stump grinder is the ideal attachment for landscaping contractors, homeowners with acreage, campus facilities, municipalities, and rental contractors. Stumps are eliminated even when used with machines equipped with high flow hydraulics.

WASTE NO TIME IN MANUAL CLEANUPWITH NEW GENERATION SWEEPERS

- These sweepers can be used in versatile applications, such as for removing debris on asphalt, cleaning of pathways, and sweeping animal sheds
- Bobcat is bringing your sweepers with a patented height adjustment system for wear compensation
- New heavy-duty bristles and added side protection for a more robust product
- For better results, add an optional gutter brush, water tank and nozzle spray kit
- Sweepers compatible and interchangeable between multiple carriers

SWEEPER

REQUIREMENTS

FEATURES & BENEFITS

- Cleans in forward or reverse.
- Wear compensation for increased bristle life by patented height adjustment system.
- Reversible cutting edge and side protection as standard ensures long product life.
- Standard cutting edge of the sweeper can be used to scrape packed material.
- Motor drain line except SW110.
- Equipped with new heavy duty bristles.
- Optional steel and polyurethane mix bristles.
- Optional gutter brush can be installed to increase versatility and increase sweeping width.
- An optional water tank can be fitted on top of the sweeper.
- Spray kit also compatible with existing loaders Water kit.

Description: The Bobcat sweeper can sweep and collect dirt or other debris in both forward and reverse. This attachment is perfect for cleaning parking lots, sidewalks, docks, and warehouses. New features like patented height adjustment placed on the top of the sweeper, double axis floating gutter brush guarantee an ease of operation while getting the job done.

Sweeper: No special requirement.

SWEEPER, HD OPEN FRAME

REQUIREMENTS

FEATURES & BENEFITS

- Cleans in forward or reverse
- Heavy duty polyurethane bristles guarantee long product life
- Standard cutting edge of the sweeper can be used to scrape packed material
- Cutting edge and side protection as standard ensures long product life
- Wear compensation for increased bristle life by height adjustment system
- Well protected hydraulic motor with pressure relief valve
- Optional gutter brush can be installed to increase versatility and increase sweeping width
- An optional water tank can be fitted on top of the sweeper
- Spray kit compatible with existing loaders' water kit

Description: The Bobcat open design sweeper can sweep and collect dirt or other debris in heavy duty applications. The brush is mounted in front of the collection bucket, allowing cleaning in tight industrial places, while guaranteeing the best weight distribution. Vertically angling the sweeper and reversing the flow can be used for material removal without collection in the bucket. This attachment is perfect for cleaning up asphalt and farm grindings. Double axis floating gutter brush guarantee an ease of operation while getting the job done.

Sweeper: No special requirement.

SWEEPER, MULTIPURPOSE

Description: The Bobcat multipurpose sweeper can sweep and collect dirt or other debris. Floating parallelogram self-levelling system guarantee an ease of operation while getting the job done. Angling the sweeper and reversing the flow allows for material removal without collection in the hopper. Multiple interface adapter makes it easily interchangeable between Bobcat carriers. This attachment is perfect for cleaning parking lots, roads, docks, and warehouses.

FOR SMOOTH OPERATION, THE TINE ROTATION SHOULD BE IN THE OPPOSITE DIRECTION OF LOADER TRAVEL.

TILT-TATCHTM

REQUIREMENTS

FEATURES & BENEFITS

- \bullet Connects as an interface between the Bob-Tach $^{\text{TM}}$ and attachment.
- Rotates right or left 15° from centre.
- Hydraulically controlled from loader seat.
- Keeps load level on uneven terrain.
- Cuts level path out of sidehill.
- Digs drainage ditches with the corner of the bucket.

Note: Use of Tilt-Tatch™ will reduce operating capacity and tip load by approximately 20%. See the Tilt-Tatch™ Operators Manual for New Load Ratings. Also, please do note that Tilt-Tatch™ can be used with non-hydraulic attachments only.

Description: Tilt-Tatch™ increases the versatility of Bobcat buckets, pallet forks and other attachments. This hydraulic tool can rotate an attachment 15° from centre to the right or left. Use it to keep loads level on sloping terrain or make a level cut on a hillside. You can even dig drainage ditches with the corner of the bucket.

TRENCHER

Description: This versatile tool can be used for a variety of jobs ranging from light to high-production trenching. Digging depths range from 60 cm to 1.5 m. The sideshift feature lets you get close to walls or fences.

TRENCH COMPACTOR

Description: Packs soil after power, water lines or other shallow trenches have been installed in a yard, golf course, park, etc. Works efficiently in trenches 20 to 40 cm wide and up to 75 cm deep. Isolated vibratory shaker box is designed for long, trouble-free operation.

UTILITY FORK

REQUIREMENTS

FEATURES & BENEFITS

- Bob-TachTM Attachment Mounting System: Makes easy work of attaching and detaching the utility fork. Fast and easy mounting means spending less time on attachment changes and more time on the job.
- Replaceable Teeth: For easy attachment maintenance, utility fork teeth are replaceable, keeping the attachment working smoothly and maximizing time spent getting work done. Provisions for adding additional forks to narrow the space between fork tines.

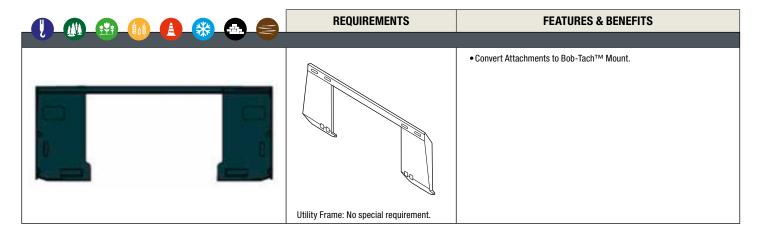

Description: Handle materials easier and move materials faster with the utility fork attachment. The strong, replaceable, tapered teeth handle a variety of farm and ranch chores easily and efficiently.

VIBRATORY ROLLER

REQUIREMENTS

FEATURES & BENEFITS

- Offset drum design allows the right side of the roller to extend past the machine. This is very useful when compacting next to sidewalks, walls, or curbs.
- \bullet Durable one-piece drum for extra strength.
- Dual-direction vibration motor permits compaction travelling in either direction.
- Rubber isolation mounts on the roller reduce vibration transfer to the loader and operator.
- Both smooth and padded drums are available.

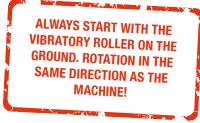

Vibratory Roller: No special requirement.

Description: The ideal compacting tool for flatwork, trenches and asphalt patching jobs. Compacts while moving forward or in reverse. Offset drum design lets you get right next to sidewalks, walls or curbs. Drum oscillation keeps the roller in contact with the surface on uneven terrain.

WATER KIT

Description: When using attachments such as a vibratory roller, angle broom or sweeper, add the water kit to help reduce dust. The water kit for loaders includes two 53 litres tanks that mount on the uprights. Electric pump supplies water to nozzles on the attachment.

WHEEL SAW

REQUIREMENTS

PERFORMANCE*

Speed: 0,5 to 5 m/min

FEATURES & BENEFITS

- *Performances are estimated only and can vary depending on the type of soil, depth of use, operator experience, .
- and rock. Cuts clean and precise without damaging the edges of the trench. A hydraulically controlled trench cleaner,
- for cleaner trenches every time (not for WS32).
- More precise cutting action than air or hydraulic hammers can provide.
- · Easier to transport than dedicated machines.
- Hydraulic sideshift.

Description: This rugged, powerful saw cuts through asphalt, concrete, frozen ground or wire mesh with more precision than air or hydraulic breakers. Use it for road repair and for laying water, gas, electric and fibre-optic cables. The trench cleaner raises and lowers hydraulically. Depending on model, cutting depth ranges from 15 cm to 80 cm.

CUT THROUGH REBAR AND CONCRETE WITH THE WHEEL SAW

- **▶** Powerful cutting through rock, concrete and asphalt
- Trench up to 200 m/hour depending on ground condition, from 5 cm to 25 cm wide up to 80 cm deep
- Compact size: Easy to transport, minimizes traffic disturbance
- Less material to backfill, exact cut minimized damage to surrounding pavement

WOOD CHIPPER

Wood Chipper: Loader must be equipped with a 7-Pin Control Kit.

- The Bobcat Wood Chipper attachment is ideal to grind branches, trees and limbs, reducing branch volume from 10 to 1.
- Grinds branches and trees up to 13 cm in diameter.
- The discharge chute can be rotated 360-degrees for maximum angle positioning.
- Operate the wood chipper from the cabin or using the Bobcat Remote Attachment Control (RAC) system. This allows the operator to start or stop the loader's engine and chipper rotation when standing beside the attachment.
- The unit comes with an automatic hydraulic feed, with speed control and load sensing system for best performance and constant flow.
- Large diameter, high torque feed roller for increase efficiency and productivity.
- Variable speed feed drive for adjusting the feed rate with a reversible option in case of plugging.
- Dual mounting locations, which allows material to be fed from the front or right side of the loader.

Description: The Bobcat wood chipper attachment grinds branches, trees and limbs, reducing branch volume 10 to 1. Unlike a pull-type wood chipper, the wood chipper attachment can easily be placed into backyards and remote areas with the manoeuvrability of a Bobcat loader. Hydraulic power feed is included as standard equipment. It allows the feed roller to move branches into the wood chipper at a consistent speed so the operator can work safely and efficiently.

AUGER

REQUIREMENTS **FEATURES & BENEFITS**

- the hole, adding 30 cm more dig depth than a standard drive unit.

 An efficient design and modified displacement give these units plenty
- Round and combination shaft augers available.
- Wide range of auger bits widths available to best meet your hole requirements.
- Choose from Standard Duty, Heavy Duty and Rock Duty bits to adequately penetrate the ground conditions.
 Extra bits extension are available for increased hole depth.

Description: Speed and perfect vertical accuracy are what you get with this high-torque, heavy-duty hydraulic auger. Its unique "knuckle-joint" design allows it to hang perfectly vertical, on flat or uneven terrain. The entire drive unit follows the bit into the hole, adding 30 cm more dig depth than a standard unit. This is the ideal tool for drilling holes for posts, piers, poles and trees in all kinds of soil conditions. Choose from 3 types of bits to best suit the ground conditions (standard, heavy duty and rock) and a multitude of widths to best meet your hole width requirement.

BORING UNIT

Description: Save the time and expenses of tearing up sidewalks, driveways and other paved areas to install irrigation lines or power and communication cables. The hydraulically powered attachment bores horizontally to accommodate pipe or cable up to 10 cm in diameter. After boring, it can pull the pipe or cable through the hole.

BRUSHCAT™ ROTARY CUTTER

REQUIREMENTS

FEATURES & BENEFITS

- Double-edge blade provides increased blade life by bidirectional cutter rotation (achieved by switching the hydraulic hoses at the drive motor)
- Direct hydraulic drive dampens impact loads and eliminates the need for shear pins or drive clutches.
- Front disks allow to better traverse uneven terrain while reducing operator fatigue.
- Floation linkage allows the deck to float over ground contours, keeping it in contact with the surface for optimum performance.
- Floating frame allows oscillation +/- 10 degrees
- Patented blade shutoff device stops blade rotation when rotary cutter is raised off the ground.

Description: Handle tough brush clearing and landscaping applications easily with the BrushcatTM rotary cutter. This attachment easily cuts through the toughest grass and brush while mulching small branches and saplings up to 7.6 cm in diameter. This tool is ideal for clearing lakefront property, construction sites, power line access roads, trails and ditches.

Bolt-On Teeth

Bolt-On Cutting Edge

Bucket Bite Tooth Bar

BUCKET (GP), GENERAL PURPOSE

REQUIREMENTS FEATURES & BENEFITS

- Round back design enhances bucket loading and cleanout
- Flat back assures a secure attaching area for the Bob-Tach™ mounting system
- Low heel makes cutting grade and backdragging easier
- Replaceable cutting edges
- Side cutting edges give better performance, increases strength and extends bucket life

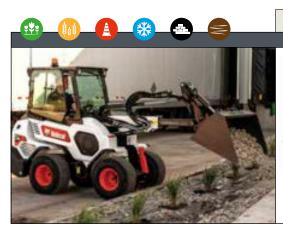

Description: General purpose buckets have a longer bottom than the dirt style. They offer excellent cutting edge visibility and good breakout force. General purpose buckets are ideal for light duty and medium duty grading and levelling applications as well as material handling.

MEET THE CHALLENGING DEMANDS OF LANDSCAPING JOBS WITH THIS LOG GRAPPLE

- Get outstanding grip with the equipped heavy-duty teeth and reinforced tines.
 Perfect for managing logs and brush!
- Easily clamp on landscape debris with the grapple's 142 cm wide opening and 360° rotation
- For better stability during operation, the log grapple comes with rope bollards
- Integrated tree pusher for increased operator control and safety
- Use this attachment with your Small Articulated Loader or Mini Track Loader

LOG GRAPPLE

Description: Meet the challenging demands of landscaping and municipality jobsites with our new log grapple! Loading logs onto trailers or transporting material out of your yard has never been easier. This free-hanging log grapple attachment has the brute force and agility to lift and move heavy logs and brush - even on tight worksites or properties.

SNOW BLADE

Snow Blade Hose Kit

REQUIREMENTS

Snow Blade: Includes hydraulic angle.

FEATURES & BENEFITS

- \bullet Snow blades angle 30 degrees to either side, using powerful hydraulic cylinders, to help move snow where you want it

 The blade angle is adjusted from the cab using fingertip controls

 Moldboard has spring trip for component protection in case of hitting a
- side walk or large stone
- Adjustable depth shoes are standard equipment
- High visibility masts provided to locate blade corners for better visibility of the blade position
- Strong, high-carbon steel cutting edge for long life
 Optional rubber cutting edge to protect pavement surfaces available through Bobcat Parts for 5- to 8-foot models
- Optional end wing kit turns Bobcat snow blades into snow pushers (end
- wing kit available for 7-foot and 8-foot models only)
 Quick loader hook-up with the exclusive Bob-Tach™ mounting system

Description: An excellent way to quickly remove light or moderate snow from sidewalks and driveways. Moldboard angles right or left up to 30°. High visibility masts help locate blade corners.

Replacement Cutting Edge

Wear Edge Kit

SNOW BLOWER

REQUIREMENTS FEATURES & BENEFITS

 \bullet Increased intake height and a larger auger draw in more snow for faster removal.

- \bullet Redesigned, rounded intake minimizes clogging and improves snow flow.
- Aggressive auger teeth easily break up and tear through hard-packed snow and ice.
- Reversible and replaceable wear edge bites into hard ice and packed
- snow and is designed for long life.

 Adjustable side-mounted and skid shoes allow operators to set the cleaning depth to match the jobsite.
- \bullet The truck loading chute allows the snowblower to place snow high in a truck box for easier removal and hauling.

Snow Blower: Includes a hydraulic motor package. Loader must be equipped with a 7-pin Attachment Control Kit.

Hose Kit

Description: Clear snow off driveways, parking lots and sidewalks with our Bobcat snow blower. The snowblower attachments feature a new and extremely durable direct-drive, sprocket-style chute that operators can rotate to throw snow in virtually any direction and place it wherever the job requires - even hard-to-reach places.

SNOW V-BLADE

REQUIREMENTS FEATURES & BENEFITS

Attachment

Control Kit

- $\bullet\,\mbox{V-Blade};$ clear a path through deep snow.
- Straight Blade: pile large amounts of snow.
- Scoop Blade: scoop, push or pile snow.
 Scoop Blade: scoop, push or pile snow.
 Soop Left or Right Angle Blade: continuously push snow to either side of the loader.
- · Fingertip adjustments of V-blade's five configurations.
- Multi-position frame allows blade to be raised or lowered to desired
- working height.
 Domed, adjustable skid shoes and trip springs provide operator and component protection.
 Optional rubber cutting edge kits available.

Snow V-Blade: Loader must be equipped with an Attachment Control Kit. When used on loader equipped with a 14-Pin Attachment Control Kit, a 14-Pin Attachment T-Harness Kit (Part Number 6735292) is required. 6725383) is required.

Hose Kit

Snow V-Blade

Description: This versatile, hydraulically operated attachment offers five different blade configurations to help operators move snow fast. The blade has on-the-go fingertip control and angles 30° right or left to continuously push snow to either side of the loader, straight or scoop configuration to push large amounts of snow, or v-configuration to plow through the deepest snow.

SOIL CONDITIONER

REQUIREMENTS FEATURES & BENEFITS

Attachment

Control Kit

Soil Conditioner

- Produces a perfect bed for seeding or laying grass turf.
- Windrows and separates rocks and other debris.
 Impressively grades and levels topsoil with ease in floating or fixed mode per landscape requirement.
- Tears out old sod.
- Pulverizes dirt clumps.
- Forward and reverse raking action.
- Roller bar follows ground contours perfectly.
 Flip-up front bolster lets you get close to buildings and saves space during transport.
 Direct-drive motor eliminates chain and sprocket problems.
- Attachable end plates for box-blade effect.

Description: A versatile, cost-effective landscaping attachment. It saves time and labour when smoothing ruts, moving material or levelling mounds. Produces a perfect bed for seeding and sodding.

GRIND TREE STUMPS INTO MULCH LIKE A PROWITH THIS STUMP GRINDER

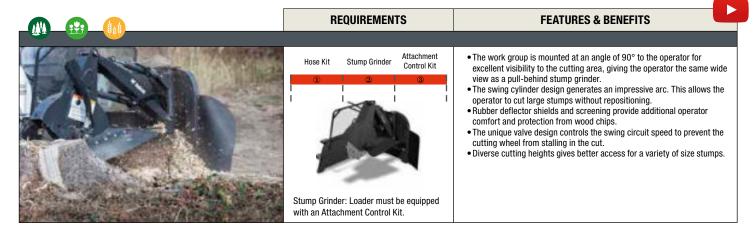

- For increased productivity during operation, the work group is mounted at an angle for excellent visibility, and the design of the swing cylinder does not require the operator to reposition its arc.
- Ideal for landscaping contractors, municipalities, and homeowners with acreage.
- This attachment can even go through tight spaces, like gates and backyards, easily.
- With this stump grinder you can improve your land aesthetics, gain agricultural space, as well as improve safety.

One Tough Animal.

STUMP GRINDER

Description: Grind tree stumps into mulch with the powerful action of the stump grinder attachment. Designed for maximum operating capability, the stump grinder mounts directly to the front of a carrier for easy maneuvering in tight areas and positioning exactly where grinding action is needed. Mounted at a 90-degree angle to the operator, the stump grinder offers increased visibility to the cutting area, giving the operator the same wide view as with any pull-behind grinder. The stump grinder is the ideal attachment for landscaping contractors, homeowners with acreage, campus facilities, municipalities, and rental contractors.

SWEEPER

Experience of the second of th

REQUIREMENTS

FEATURES & BENEFITS

- Wear compensation for increased bristle life by patented height adjustment system.
- Reversible cutting edge and side protection as standard ensures long product life.
- Standard cutting edge of the sweeper can be used to scrape packed material.
- Motor drain line except SW110.
- \bullet Equipped with new heavy duty bristles.
- Optional steel and polyurethane mix bristles.
- Optional gutter brush can be installed to increase versatility and increase sweeping width.
- An optional water tank can be fitted on top of the sweeper.
- Spray kit also compatible with existing loaders Water kit.

Description: The Bobcat sweeper can sweep and collect dirt or other debris in both forward and reverse. This attachment is perfect for cleaning parking lots, sidewalks, docks, and warehouses. New features like patented height adjustment placed on the top of the sweeper, double axis floating gutter brush guarantee an ease of operation while getting the job done.

Description: Speed and perfect vertical accuracy are what you get with this high-torque, heavy-duty hydraulic auger. Its unique "knuckle-joint" design allows it to hang perfectly vertical, on flat or uneven terrain. The entire drive unit follows the bit into the hole, adding 30 cm more dig depth than a standard unit. This is the ideal tool for drilling holes for posts, piers, poles and trees in all kinds of soil conditions. Choose from 3 types of bits to best suit the ground conditions (standard, heavy duty and rock) and a multitude of widths to best meet your hole width requirement.

SNOW BLADE

FEATURES & BENEFITS

- \bullet Snow blades angle 30 degrees to either side, using powerful hydraulic
- cylinders, to help move snow where you want it The blade angle is adjusted from the cab using fingertip controls
- \bullet Moldboard has spring trip for component protection in case of hitting a side walk or large stone
- Adjustable depth shoes are standard equipment
- High visibility masts provided to locate blade corners for better visibility of the blade position
- Strong, high-carbon steel cutting edge for long life
- Optional rubber cutting edge to protect pavement surfaces available through Bobcat Parts for 5- to 8-foot models
- Optional end wing kit turns Bobcat snow blades into snow pushers (end wing kit available for 7-foot and 8-foot models only)

 • Quick loader hook-up with the exclusive Bob-Tach™ mounting system

Description: An excellent way to quickly remove light or moderate snow from sidewalks and driveways. Moldboard angles right or left up to 30°. High visibility masts help locate blade corners.

SWEEPER

FEATURES & BENEFITS

- Wear compensation for increased bristle life by patented height adjustment system.
- Reversible cutting edge and side protection as standard ensures long product life.
- Standard cutting edge of the sweeper can be used to scrape packed material.
- Motor drain line except SW110.

• Cleans in forward or reverse.

- Equipped with new heavy duty bristles.
 Optional steel and polyurethane mix bristles.
 Optional gutter brush can be installed to increase versatility and increase eversatility. increase sweeping width.
- An optional water tank can be fitted on top of the sweeper.
- Spray kit also compatible with existing loaders Water kit.

Description: The Bobcat sweeper can sweep and collect dirt or other debris in both forward and reverse. This attachment is perfect for cleaning parking lots, sidewalks, docks, and warehouses. New features like patented height adjustment placed on the top of the sweeper, double axis floating gutter brush guarantee an ease of operation while getting the job done.

SWEEPER, HD OPEN FRAME

Description: The Bobcat open design sweeper can sweep and collect dirt or other debris in heavy duty applications. The brush is mounted in front of the collection bucket, allowing cleaning in tight industrial places, while guaranteeing the best weight distribution. Vertically angling the sweeper and reversing the flow can be used for material removal without collection in the bucket. This attachment is perfect for cleaning up asphalt and farm grindings. Double axis floating gutter brush guarantee an ease of operation while getting the job done.

BE PRODUCTIVE AND EFFICIENT WITH THIS MULTIPURPOSE SWEEPER THAT COLLECTS SWEPT UP WASTE

- Achieve the best sweeping results thanks to the multipurpose sweepers' self-levelling system that adapts to the different grounds.
- Clean hangars, stables, or other industrial areas with ease, and for easy collection, all debris is collected in the bucket with the counter-clockwise sweeping.
- Engineered for heavy-duty applications, thanks to reinforced frames, polyurethane bristles, and added side protection.
- Choose the sweeper to your carrier: CTL, SSL, CWL, SAL, TLS.

SWEEPER, MULTIPURPOSE

Description: The Bobcat multipurpose sweeper can sweep and collect dirt or other debris. Floating parallelogram self-levelling system guarantee an ease of operation while getting the job done. Angling the sweeper and reversing the flow allows for material removal without collection on the hopper. Multiple interface adapter easily interchangeable for each carrier. This attachment is perfect for cleaning parking lots, roads, docks, and warehouses.

BOX BLADE

reliability.

REQUIREMENTS

FEATURES & BENEFITS

- Heavy-duty, rear-mount with replaceable cutting edges

- Adjustable and replaceable ripper shanks
 Scarifier allows a maximum working depth of 10 cm
 Simply attach it to the 3-point hitch to get started
 The box blade can be raised or lowered to control the height of the cutting edge
- Operates in forward or reverse

Requirements: No special requirement.

Description: The heavy-duty, rear-mount compact tractor box blade offers impressive versatility for levelling, backfilling, grading and moving a variety of material, including gravel, topsoil, mulch, manure and more. Use it around barns, gardens, buildings, and even roads. Lower the cutting edge to cut, and raise it to dump the material. Double-lug lower hitch points ensure top performance and

USE YOUR FRONT-END LOADER IN EVERY SEASON

- The Front-End Loader comes standard with a general-purpose bucket, but you can use it with a variety of Bob-Tach™ attachments.
- Attach and detach to your compact tractor within seconds, depending on the job.
- It is perfect to haul, scoop, grade, dig, and can even be used in more applications!

FRONT-END LOADER

Description: Use your front-end loader in every season to haul, scoop, grade, dig and more. The Bobcat front-end loader is easy to attach and remove, plus it delivers leading lift capacity and height for exceptional productivity.

SEEDER

REQUIREMENTS

FEATURES & BENEFITS

- 182 cm seeding width

- Variable seeding rate
 Three-point mount standard
 Optimum seed-to-soil contact
- Front rollers crush lumps and press down small stones to form a firm, well-prepared seedbed
- Rear rollers split the shallow ridges made by the front rollers and gently form the soil around the seeds

Description: Accurate seed placement and adjustable metering. Unlike broadcast seeders, the Bobcat seeder places the seed with the proper spacing and at precisely the right depth for better germination and coverage. It also eliminates broadcasting seed into unwanted areas. The seeder is efficient and cost-effective. Use it for seeding projects on landscaping sites, acreages, farms and more.

SNOW BLOWER, REAR

REQUIREMENTS

FEATURES & BENEFITS

- \bullet Easily attaches behind your compact tractor to remove snow while driving in reverse
- No need to remove your front-end loader
 A manual rotating (up to 230 degrees) chute directs snow wherever you want it, to pile it high or throw it far
- The 14-inch auger and four-blade fan are shear-bolt protected
- Skid shoes can be adjusted to scrape surfaces clean or set higher to remove snow from gravel lots or driveways
- An optional hydraulic chute rotator works great on compact tractors with a cab
- A shear bolt driveline protection

Description: Bobcat 3-point snowblowers are perfect for blowing off snow away from concrete or gravel driveways and parking lots. These snowblowers function from the rear PTO and 3-point hitch of the tractor. They are powerful, productive and easy to operate. Chute rotation is achieved by a manual chute rotator that is accessible from the tractor operating station or by an optional hydraulic chute rotator that works great for a compact tractor with a cab. Easily clears paths around acreages or barns.

Requirements: No special requirement.

NO JOBSITES CAN STOP THESE TILLERS - QUICKLY TURN A BACKYARD PLOT INTO A SOIL BED

- Incorporate thick layers of mulch or other fertilizers, thanks to the forward rotating flanges of our tillers.
- Wide variety of sizes to choose from. Same or larger width recommended than your tractor to guarantee the best results.
- Get the maximum mulching result with the 6 tines per flange on these tillers.
- Integrated slip clutch for long product life.

REQUIREMENTS

FEATURES & BENEFITS

- Built for easy and efficient soil preparation, the 3-point tiller quickly turns a backyard plot into a soil bed
- Perfect for cultivating, aerating and stirring up soil for gardens, food plots and other tillage needs
- Adjustable skid shoes support tilling up to 17 cm deep
 Designed to work close to buildings, fences and trees
- Category 1 3-point Hitch

Tiller: Rear-PTO powered 540 rpm.

Description: A great landscaping attachment. Break ground; prepare soil for planting; amend soil with fertilizer, manure or mulch; and remove weeds between tree rows. Bobcat tiller tines can have a forward or reverse rotation. Use forward rotation to mix loose mulch into the soil, and reverse rotation for application on hard and dry ground, for optimum productivity.

TINE RAKE

Description: Easily rakes and collects surface debris, such as rocks, roots, and weeds. Good for lawn preparation for reseeding and fertilizing. Exceptionally strong and durable, the rake can be angled or reversed simply by relocating the index pin. Tines are individually replaceable for easy, low-cost maintenance. Put it to work maintaining gravel in parking lots, driveways, or walking trails.

TELEHANDLERS

BOBCAT TELEHANDLERS – FAR-REACHING VERSATILITY

Quick-Tach: Change attachments easily, comfortably and safely

Manual Quick-Tach

The Quick-Tach is a robust tool-carrier frame allowing you to mount any type of attachment on Bobcat telehandlers. The open shape offers good visibility on the attachment. The light yet robust design saves weight in order to maintain optimum machine capacity. The robust frame is made of thick steel plates, assembled with large transversal tubes, ensuring efficient absorption of shocks during heavy-duty jobs. And the 2 hooks are clearly visible to make mounting the attachment very convenient for the operator.

Hydraulic Quick-Tach

As quick as a snap, you can replace a bucket with pallet forks, a landscape rake, a bale handler, an auger, a grapple and more, thanks to the Bobcat hydraulic Quick-Tach mounting system.

This easy yet powerful mounting system allows you to mount and dismount attachments quickly. You can even change non-hydraulic attachments without leaving the cab. The hydraulic Quick-Tach saves time on every job site.

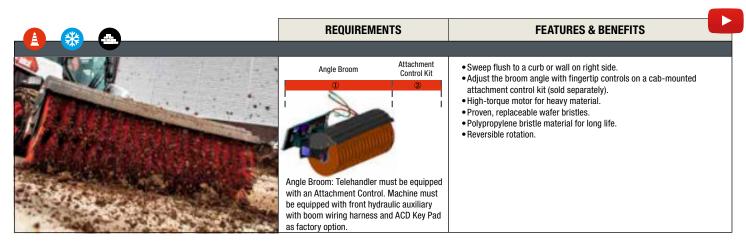

Quick couplers (with pressure release)

This unique design ensures that hydraulic attachment changes go quickly and smoothly. Trapped line pressure can make attachment changes anything but quick. So Bobcat telehandlers come with a handy feature to release trapped pressure. By simply pushing the coupler inward, the hydraulic oil is released through a return line back into the machine. The result: clean, quick attachment changes, time after time.

ANGLE BROOM

Description: Dirt, dried mud, light snow and other debris are quickly and efficiently swept away with this hydraulically driven attachment. Whether you're sweeping driveways, farmyards or warehouses, you can depend on the angle broom to get the job done right.

AUGER

REQUIREMENTS

Mounting Frame

Drive Units

Bits

FEATURES & BENEFITS

- $\bullet\,\text{A}$ smaller drive housing allows the entire drive unit to follow the bit into the hole, adding 30 cm more dig depth than a standard drive unit.

 • An efficient design and modified displacement give these units plenty of
- torque.
- Round and combination shaft augers available.

 Wide range of auger bits widths available to best meet your hole
- requirements.

 Choose from Standard Duty, Heavy Duty and Rock Duty bits to adequately penetrate the ground conditions.
- Extra bits extension are available for increased hole depth.

auxiliary

Description: Speed and perfect vertical accuracy are what you get with this high-torque, heavy-duty hydraulic auger. Its unique "knuckle-joint" design allows it to hang perfectly vertical, on flat or uneven terrain. The entire drive unit follows the bit into the hole, adding 30 cm more dig depth than a standard unit. This is the ideal tool for drilling holes for posts, piers, poles and trees in all kinds of soil conditions. Choose from 3 types of bits to best suit the ground conditions (standard, heavy duty and rock) and a multitude of widths to best meet your hole width requirement.

BALE HANDLER WITH TINES

REQUIREMENTS

FEATURES & BENEFITS

- Frame made of high strength steel for long lasting.
 Reinforced forged tines diam. 25 mm for high stress.
 Delivered with structure, mechanical interface and hose kits.
 Proper hydraulic hose routing to avoid damages.

Bale Handler with Tines: Machine must have front hydraulic auxiliary.

Description: These handlers are designed to transport and load one or two round farm bales (diameters from 1.2 to 1.6 m). To grip the bales firmly, the handler is equipped with two hydraulically operated arms with brackets with 4 forged spikes (prongs) on each side.

BALE SPIKE

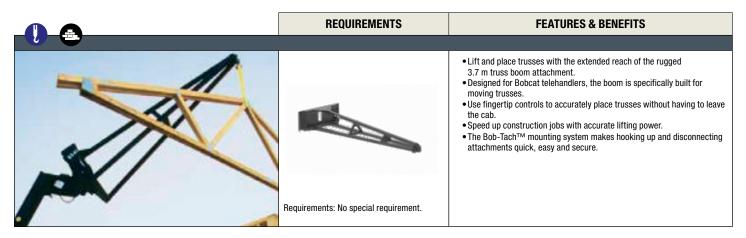

Description: The pair of small-diameter forks gives you advantages over a single spike. They stabilise the load better by balancing round bales and securing uneven bales, making transport and loading easier. This simple attachment is mounted on a rigid pallet fork frame. Designed for bales of 75 cm or 110 cm height.

BOOM TRUSS

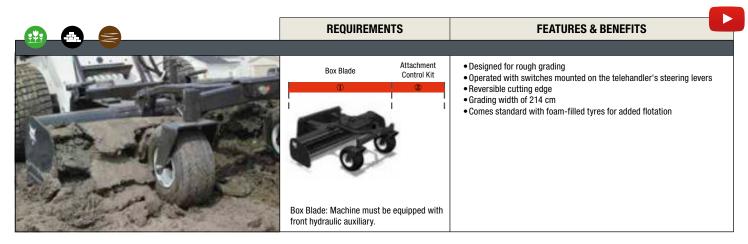

Description: Designed for the telehandler, the rugged 3.7m boom is built for moving trusses on construction jobsites. Fingertip controls operate the attachment, accurately placing trusses without ever having to leave the operator cab, maximising operator comfort. Speed up construction jobs with the accurate lifting power of the truss boom attachment.

BRUSHCAT™ ROTARY CUTTER

REQUIREMENTS FEATURES & BENEFITS

- Double-edge blade provides increased blade life by bidirectional cutter rotation (achieved by switching the hydraulic hoses at the drive motor)
- Direct hydraulic drive dampens impact loads and eliminates the need for shear pins or drive clutches.
- Front disks allow to better traverse uneven terrain while reducing operator fatigue.
- Floation linkage allows the deck to float over ground contours, keeping it in contact with the surface for optimum performance.
- Floating frame allows oscillation +/- 10 degrees
- Patented blade shutoff device stops blade rotation when rotary cutter is raised off the ground.

Description: Handle tough brush clearing and landscaping applications easily with the BrushcatTM rotary cutter. This attachment easily cuts through the toughest grass and brush while mulching small branches and saplings up to 7.6 cm in diameter. This tool is ideal for clearing lakefront property, construction sites, power line access roads, trails and ditches.

BUCKET (CI), CONSTRUCTION / INDUSTRIAL

REQUIREMENTS

- **FEATURES & BENEFITS**
- Ideal for everything from tough digging to material handling
- Good cutting edge visibility
 Excellent bucket breakout force for better digging and easier bucket

Description: The strongest of all Bobcat buckets. Ideal for everything from tough digging to material handling. Construction / industrial buckets offer good cutting edge visibility and excellent bucket breakout force for better digging and easier bucket filling. Heavy-duty construction / industrial buckets offer even more features required for severe-duty use.

BUCKET, GRAPPLE

REQUIREMENTS

FEATURES & BENEFITS

- Reliable design with cylinders protected on the rear

- Large welded spill guard
 Robust 10 mm high strength steel
 Reversible bolt-on edge, bolted flanges and hydraulic hoses included

Bucket Grapple: Machine must have front hydraulic auxiliary.

Description: You can use this durable grapple to move hard-to-handle agricultural materials. The hydraulically-controlled grapple is also easy to operate, fast and close strong. Available with bolt-on forged teeth (easy to replace and suitable for silage) or with oxycut welded teeth (more durable). Side flanges are bolted and so can be removed easily.

Bucket Grapple with welded teeth

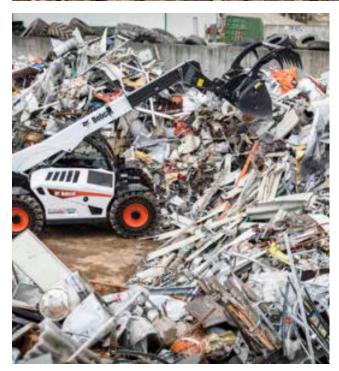

Bucket Grapple with forged teeth

BRING OUT THE BEST OF YOUR MACHINE IN AGRICULTURAL AND RECYCLING APPLICATIONS

- These large volume grapple buckets with welded or forged teeth will push your productivity.
- ▶ For easy connection, the buckets come with Bobtach, Quicktach or Manitach connection.
- ▶ Robust buckets manufactured in France for longer lifetime and best quality
- Use these buckets for silage, feed and recycling material handling

BUCKET, LIGHT MATERIAL

Description: The large volume of Bobcat Light Material Buckets is designed for loading and handling a variety of light materials such as mulch, snow and grain.

CONCRETE BASKET

REQUIREMENTS

FEATURES & BENEFITS

- The concrete basket is locked by a chain to the pallet fork frame, for safety reason.
- Reduces damage to turf and underground utilities caused by using large concrete trucks.

Concrete Basket: Use of forks or hook is required. Machine option Hydraulic line on boom is required for hydraulic opening version.

Description: With our concrete basket attachment, you can quickly pour your concrete wherever you need to. The flexible hose can be easily routed through small openings, under wooden decks, through bushes and around other common obstructions.

FLAIL CUTTER

REQUIREMENTS

FEATURES & BENEFITS

- Variable speed displacement motor allows the flail cutter to be "tuned in" to your machine, depending on its hydraulic capacity. By varying the motor displacement to accept auxiliary hydraulic flows ranging from 64 to 151 $\mbox{\ensuremath{\text{I}}}/$ min, the flail cutter can be operated on many different carriers.
- Floating linkage is standard on the flail cutter. This, along with the attachment's compact deck length, lets the unit follow the contour of the $% \left(1\right) =\left(1\right) \left(1\right)$ land regardless of the pitch or attitude of the carrier, permitting the cutter $\mbox{\sc up}$ to ten degrees of oscillation.
- Safety compliance The flail cutter complies with the SAE J1001 standard for Garety Compination The Individuel Compines with the SAE J1001 standard to industrial flail mowers. It is standard-equipped with an automatic shut-off device which allows approximately ten inches of vertical travel in the Bob-TachTM; mounting system before the flail cutter shuts down.
 Full width tapered rear roller provides greater turning ability during appraisals.
- operation.
- Adjustable rear hatch allows operators to vary the size of discharged material, ranging from small, for mulching applications to coarse for high performance cutting.

Flail Cutter: Machine must have front hydraulic auxiliary.

Description: The flail cutter is ideal for cutting overgrowth on construction sites as well as alongside roads and sidewalks. It adjusts to follow ground contour.

GRAPPLE, FARM – UTILITY ON BUCKET

REQUIREMENTS

FEATURES & BENEFITS

- Move hard to handle materials easily
- Hydraulically controlled grapple is easy to operate
 Exclusive Bob-Tach™ mounting system lets you change to another attachment quickly
- Grapple design allows you to get the forks or bucket close to fences or the sides of walls

Description: This is the easy way to handle loose hay, bedding and manure on the farm and other sites. Use the utility bucket by itself or add the hydraulic grapple for more gripping power.

front hydraulic auxiliary.

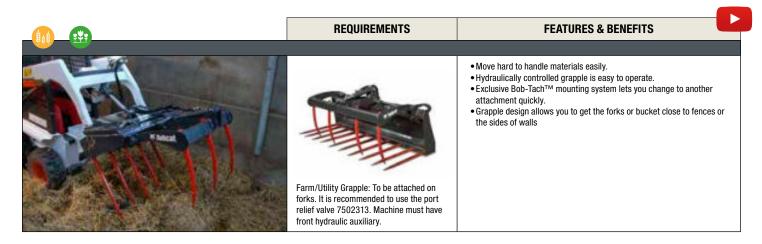

Farm/Utility Grapple: To be attached on bucket. It is recommended to use the port relief valve 7502313. Machine must have

MAN PLATFORM, EXTENDABLE ROTATING

REQUIREMENTS

FEATURES & BENEFITS

- Hydraulically extendable from 2.4 m to 4 m
- Hydraulically rotate up to 90° in both directions
 Boom, extension and rotation remotly controlled from basket
- 3 people maximum
- 300 kg or 800 kg lift capacity maximum (including people)

Description: The Bobcat man platform gives you great flexibility in your work as it eliminates the need for scaffolding and safety nets while simplifying and speeding up the job. Bobcat man platforms are fully homologated and easily fitted to your machine without roll-up cables, thanks to the wireless remote control.

MAN PLATFORM, FIXED

Man Platform: Machine HAS to be ordered with the "Man platform ready" option (option not retrofittable in the field). Radio remote control is required to operate the platform.

- Made of galavanised steel.
- Allows you to access any kind of work space quickly and safely.

 2 people with maximum 60 kg tools.

 220 kg lift capacity maximum (including person)

Description: The Bobcat man platform gives you great flexibility in your work as it eliminates the need for scaffolding and safety nets while simplifying and speeding up the job. Bobcat man platforms are fully homologated and easily fitted to your machine without roll-up cables, thanks to the wireless remote control.

MIXING BUCKET: GREAT AID TO OPERATORS IN CONSTRUCTION AND ROAD WORK APPLICATIONS

- Mix, transport, and pour concrete much quicker with these three models of mixing bucket.
- It is a rugged, cost-effective attachment, increasing your efficiency.
- ▶ The compact sizes of the buckets, and the TL25.60 allow you to work in hard-to-reach places.
- Ideal to work along sidewalks, driveways, do finish work, footings or even floors.

MIXING BUCKET

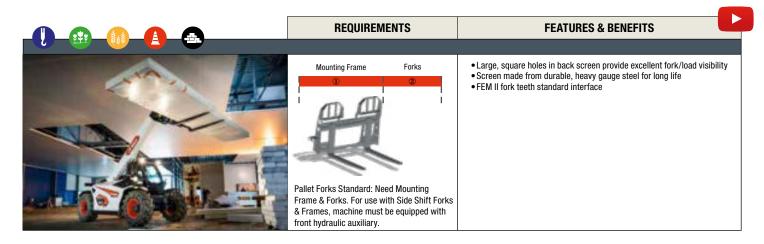

Description: This rugged, cost-effective attachment lets you mix, transport, and pour concrete much quicker than a stand alone mixer. Its compact size makes it ideal for sidewalks, driveways, finish work, footings and floors of small buildings and hard-to-reach or limited access areas.

PALLET FORK, FLOATING

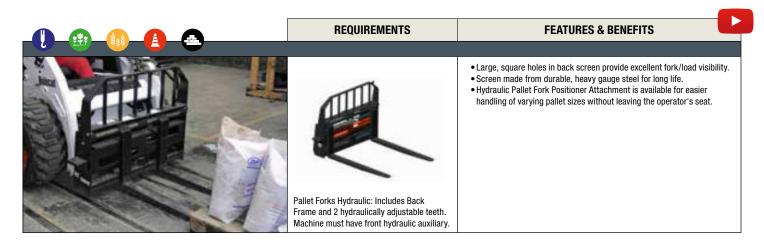

Description: Use this versatile attachment to lift, carry, stack or place all types of pallet materials even on rough and uneven surfaces in construction sites, municipal projects, industrial areas and farms. Floating forks are free to swing while always remaining level with the ground, to avoid load spillage. Bobcat also offers you the choice of two frame widths – 1.0 m or 1.5 m – to suit your needs.

PRESSURE WASHER

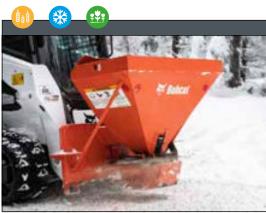

Description: The Bobcat Pressure Washer is a versatile attachment that can be used to clean and sanitize streets, remove graffitis and even for railroad, bridge or tunnel maintenance. It's dustfree design enables the attachment to be used when laying asphalt, providing a clean surface for bituminous material laying. Designed to spray high pressured water on roads or any kind of surface that needs to be cleaned. Washing handgun with 20 meters hose reel makes cleaning effective and easy.

SALT & SAND SPREADER

REQUIREMENTS FEATURES & BENEFITS

- year round.
 Three gates allow you spread up to 180° and up to 8 m wide.
- Self-loading from a stockpile like a normal bucket with a capacity of 0.33 m³
- An agitator is located in the hopper to facilitate the flow of caked material.
- Large chunks of sand and salt are filtered through the screen at the top of the hopper for even, consistent flow.
- A cab control allows you to regulate the spinner wheel rpm directly from the operator's seat.

Description: Ideal for spreading in confined areas such as parking lots and pedestrian zones where larger equipment cannot be used. Also excellent for spreading fertiliser and seed.

SNOW BLADE

REQUIREMENTS

FEATURES & BENEFITS

Snow Blade: Included hydraulic angle. Machine must have front hydraulic auxiliary.

- \bullet Snow blades angle 30 degrees to either side, using powerful hydraulic cylinders, to help move snow where you want it
- \bullet The blade angle is adjusted from the cab using fingertip controls
- \bullet Moldboard has spring trip for component protection in case of hitting a side walk or large stone
- Adjustable depth shoes are standard equipment
- High visibility masts provided to locate blade corners for better visibility of the blade position
- Strong, high-carbon steel cutting edge for long life
- Optional rubber cutting edge to protect pavement surfaces available through Bobcat Parts for 5- to 8-foot models
- Optional end wing kit turns Bobcat snow blades into snow pushers (end wing kit available for 7-foot and 8-foot models only)
 • Quick loader hook-up with the exclusive Bob-Tach™ mounting system

Description: An excellent way to quickly remove light or moderate snow from sidewalks and driveways. Moldboard angles right or left up to 30°. High visibility masts help locate blade corners.

SNOW BLOWER

REQUIREMENTS

FEATURES & BENEFITS

- Increased intake height and a larger auger draw in more snow for faster removal.
- Redesigned, rounded intake minimizes clogging and improves snow flow.
- Aggressive auger teeth easily break up and tear through hard-packed snow and ice.
- Reversible and replaceable wear edge bites into hard ice and packed snow and is designed for long life.
- Adjustable side-mounted and skid shoes allow operators to set the cleaning depth to match the jobsite.
- The truck loading chute allows the snowblower to place snow high in a truck box for easier removal and hauling.

Description: Clear snow off driveways, parking lots and sidewalks with our Bobcat snow blower. The snowblower attachments feature a new and extremely durable direct-drive, sprocket-style chute that operators can rotate to throw snow in virtually any direction and place it wherever the job requires - even hard-to-reach places.

SNOW V-BLADE

REQUIREMENTS FEATURES & BENEFITS

Attachment Control Kit

- V-Blade: clear a path through deep snow.
- Straight Blade: pile large amounts of snow.
- Scoop Blade: scoop, push or pile snow.
- $\bullet\,30^{\circ}$ Left or Right Angle Blade: continuously push snow to either side of the loader.
- \bullet Fingertip adjustments of V-blade's five configurations.
- Multi-position frame allows blade to be raised or lowered to desired working height.
- Domed, adjustable skid shoes and trip springs provide operator and component protection.
- Optional rubber cutting edge kits available.

Snow V-Blade: Telehandler must be equipped with an Attachment Control and an ACD Key Pad as factory option. When used on a telehandler equipped with a 14-Pin Attachment Control Kit, a 14-Pin Attachment T-Harness Kit is required. Machine must have front hydraulic auxiliary.

Snow V-Blade

Description: This versatile, hydraulically operated attachment offers five different blade configurations to help operators move snow fast. The blade has on-the-go fingertip control and angles 30° right or left to continuously push snow to either side of the loader, straight or scoop configuration to push large amounts of snow, or v-configuration to plow through the deepest snow.

SWEEPER

REQUIREMENTS

Sweeper

FEATURES & BENEFITS

- Cleans in forward or reverse.
- Wear compensation for increased bristle life by patented height adjustment system.
- Reversible cutting edge and side protection as standard ensures long product life.
- Standard cutting edge of the sweeper can be used to scrape packed material.
- Motor drain line.
- Equipped with new heavy duty bristles.
- Optional steel and polyurethane mix bristles.
- Optional gutter brush can be installed to increase versatility and increase sweeping width.

Description: The Bobcat sweeper can sweep and collect dirt or other debris in both forward and reverse. This attachment is perfect for cleaning parking lots, sidewalks, docks, and warehouses. New features like patented height adjustment placed on the top of the sweeper, double axis floating gutter brush guarantee an ease of operation while getting the job done.

SWEEPER, HD OPEN FRAME

Description: The Bobcat open design sweeper can sweep and collect dirt or other debris in heavy duty applications. The brush is mounted in front of the collection bucket, allowing cleaning in tight industrial places, while guaranteeing the best weight distribution. Vertically angling the sweeper and reversing the flow can be used for material removal without collection in the bucket. This attachment is perfect for cleaning up asphalt and farm grindings. Double axis floating gutter brush guarantee an ease of operation while getting the job done.

TILLER

REQUIREMENTS **FEATURES & BENEFITS**

- \bullet Bidirectional rotation allows both top-cutting and undercutting in either Travel direction.

 Offset mounting permits tilling next to sidewalks, curbs and buildings.

 Hydraulically powered; no shear pins to maintain.

 Hardened, double-edge, replaceable tines.

 Exclusive Bob-TachTM mounting system permits quick hookup to loader.

- Forward/reverse travel direction.

Tiller: Machine must have front hydraulic auxiliary.

Description: A great landscaping attachment. It quickly breaks up ground and mixes compost and other materials into the soil. Offset mounting permits tilling next to sidewalks, curbs and buildings.

MAN PLATFORM, EXPANDABLE

REQUIREMENTS

FEATURES & BENEFITS

- Extendable design
- +/- 90° rotation
- Galvanised, reinforced steel structure
- Non-slip floor for maximum safety
- Equipped with overload sensor
- Practical anti-shock system which ensures smooth, even rotational movements when stopping and starting movement
 Extension system allowing you to gain one metre per side.
 Equipped with practical fork slots for movement during storage

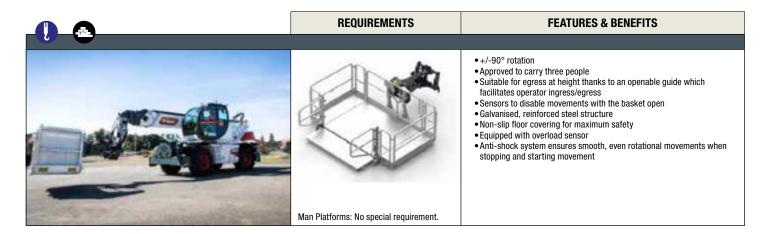

Man Platforms: No special requirement.

Description: Use the man platform for great flexibility in work, working with scaffoldings or other applications in heights, while simplifying and speeding up the job.

PALLET FORKS, FLOATING

REQUIREMENTS

FEATURES & BENEFITS

- \bullet Pick up and place pallets to and from truck beds, scaffoldings and rooftops
 • Foldable forks for road circulation
- Forks are independently adjustable
- · Forks can easily adapt to uneven ground conditions thanks to the eyebolt feature on frame

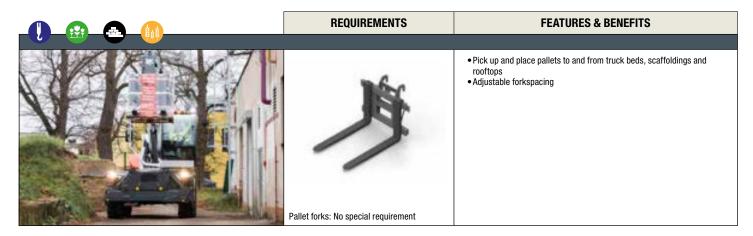

Description: Use this versatile attachment to lift, carry, stack or place all types of pallet materials even on rough and uneven surfaces in construction sites, municipal projects, industrial areas and farms. Floating forks are free to swing while always remaining level with the ground, to avoid load spillage.

BACKHOE LOADERS

BREAKER

REQUIREMENTS

FEATURES & BENEFITS

- The cylindrical design improves access to jobs in confined areas, providing accurate attachment operation in more operating environments.
- Upper and lower shock absorbers isolate the breaker from the housing, reducing noise and vibration to deliver operator comfort without sacrificing performance. Silences standard for breaker model.
- Diaphragm-type accumulators reduce maintenance by preventing slow leaks.
- leaks.
 Long-life breaker designed for all demolition jobs with minimal maintenance.
- The innovative steel ring feature allows retaining the tool brushing, protecting the grease access and provides a quick tool change solution.
- Designed for minimum downtime and with few service parts to reduce operation cost and improve overall lifetime of the attachment.
- Bobcat breakers produce low recoil and minimal hydraulic pressure spike to their carriers.
- Breakers can be mounted on your backhoe loaders with various sustems: directly to the arm pin onto the arm, with the hydraulic quick coupler or with either of the two mechanical couplers Klac and German Systems

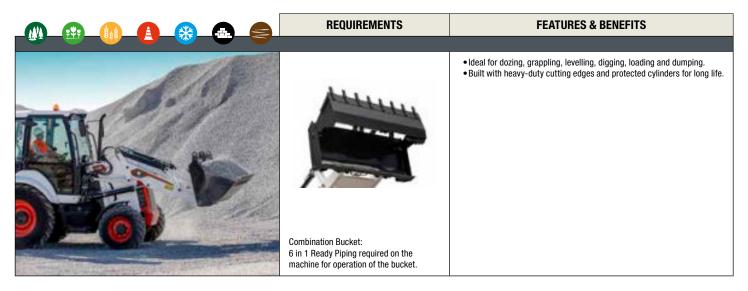

Breaker includes: Nail Point, fixing cap bolts, gauge tool and hose protector. Special Application Kit must be installed on the machine.

Description: Bobcat breakers offer high performance, low maintenance, and are easy to use. All breakers feature a frame with a cylindrical design, providing improved access to jobs in confined areas. All breakers have a silences housing as standard.

BUCKET, DIGGING

REQUIREMENTS

FEATURES & BENEFITS

- Choose from our selection of widths to best suit your need.
 Bolt-on teeth: easily replace worn out teeth and utilize different styles of teeth.
 • Optimized shape for maximum efficiency and capacity.

Description: Tackle the toughest digging and material handling jobs with our robust digging buckets. They offer excellent breakout force for digging and easier bucket filling.

QUICK-COUPLER

Description: These quick-couplers allow you to change attachments quickly, easily, and safely. The mechanical coupling system gives you a compact solution to change between many, and secure, attachments safely. Coupler systems turn your backhoe loader into tool-carier machines. Always use the right tool by switching between buckets within minutes, thanks to the easy hook and self-locking system.

COURSE LEVELS

We can offer you:

- 4 classrooms
- 3 workshops
- 2 roadshow trucks
- A large demo fleet
- Over 19,000 m² of demo area
- Courses in different languages, locally or in our Dobris training facility

Check our e-courses on the Doosan Bobcat Learning Center:

- Accessible via Doosan Passport
- Available 24/7
- Available usually in 6 languages
- Also, replay popular webinars

Contact us for more information: bobcatinstitute@doosan.com

THE BOBCAT INSTITUTE REQUEST YOUR DEMO

THE DEMO TEAM CAN HELP YOU WITH:

- ▶ A large demo fleet of Bobcat equipment, including attachments, at your disposal*
- Access to professional Field Product Trainers, for live demonstrations
 - On our large demo site
 - At your local size
- Access to Roadshow Trucks for local events*

*Terms and conditions apply

THE BOBCAT INSTITUTE

TRAINER'S TIPS AND TRICKS

LEARN TIPS AND TRICKS OPERATING YOUR BOBCAT EQUIPMENT FROM THE EXPERTS

- ▶ Check our Bobcat Trainer's Tips & Tricks channel on YouTube
- Available in 6 languages
- Subscribe to our YouTube channel to get new video updates!
- And submit us any topics of interest to you!

BOBCAT DEMO DAYS

DEMO DAYS IS A UNIQUE OPPORTUNITY TO:

- Test all Bobcat equipment in a safe environment with experts at your service
- ▶ Try all Bobcat attachments (forestry, demolition, landscaping, ...)
- Preview new models/options and innovations
- Visit the impressive factory
- Speak with professionals (demonstrators, product managers, Application Sales Managers, trainers, engineers, ...)
- Learn about other trainings offered by the Bobcat Institute

Location: Bobcat Campus, Dobříš (Prague area), Czech Republic

GENUINE ATTACHMENT PARTS

TOOLS FOR HYDRAULIC BREAKERS

Bobcat offers a selection of breaker tools, equipping you with the right tool for each job. Select the right tool for the type of rock, concrete or asphalt you need to break.

- Chisels and insertion tools, precisely designed to transmit the energy of the breaker striking mechanism
- The tools are adjusted optimally to their relevant application using a special hardening process
- Extreme toughness and high fatigue strength for long service life

| | | | | | | | | | | |
| | FLAT POINT General use with additional cutting action. Optimal for drawing pits in rocky subsoil and separating rock slabs. Both parallel to the shank cutting edge and 90° indexed cutting edge available. | | | NAIL POINT General use for demolition work and in quarries. Ideally suited for breaking up slag in steel mills (industrial application) and demolishing foundations. Roadway drivage and | | Used for general demolition work where penetrative breaking is required. | | BLUNT POINT The versatile blunt tool. Ideal for breaking stone blocks, for crushing large rock pieces in quarries and for crushing slag. Also suitable for ground compression. | | |

RING BRUSHES & GUTTER BRUSHES

A wide range of ring brushes & gutter brushes, covering Bobcat and other brand attachments. Efficient sweeping of dirt, dried mud, gravel, light snow and other debris.

- Extremely durable combination of strands with the inner ring increases the strength of the brush, which allows you to perform extreme work without any loss of strands
- Convoluted or flat design to fit all types of applications
- Convoluted (zig-zag) ring designed to be used without distance rings easier installation and no need for spacers

GET MORE OUT OF YOUR ATTACHMENTS

Try the 50% polypropylene and 50% steel bristles combination on Bobcat Sweepers 110, 140, 155, 185 and 215 models to make sure you get the most out of your attachment. Learn more on page 121.

RING BRUSH MATERIALS

Our Bobcat bristles offer more hours between changes, so you get more done without spending more. Durable and long-lasting Bobcat skid steer loader broom bristles for your sweeper or broom ensure you get your sweeping jobs done right the first time, every time. Our bristles are designed to make guick work of common challenges like gravel, mud, road debris, leaves, snow.

POLYPROPYLENE BRUSH

Polypropylene rings are the most popular and common type. They work well in majority of situations. These lighter brushes are typically selected for less severe conditions (no ice, frozen and packed snow, or compacted dirt). They have the best flick and are used for effectively sweeping asphalt, clay, gravel, light powdery snow, sand, and other road debris. They are not causing undue stress to asphalt on runways or other sensitive surfaces.

- Designed for effective debris removal under normal sweeping conditions (asphalt debris, clay, gravel, light snow, sand and other road debris)
- Available either with polypropylene or steel inner ring.
- 2.5-4 mm thick polypropylene brushes, increasing ring longevity.
- Polypropylene inner ring is non-corrosive, suitable for all weather conditions and 100% recyclable.

POLY-STEEL BRUSH

Best of both worlds with poly bristles and wire bristles on one wafer. These ring works in the same way as altering individual poly and steel rings on one attachment described on following page. Get the flicking action of poly bristles combined with the aggressive ability of wire bristles.

- Designed for medium to severe applications.
- Resistant steel inner ring.
- · Ideal for all sweeping conditions.

STEEL INNER RING / STEEL BRUSH

Steel filings add very aggressive cutting action needed for breaking packed material and heavy debris which cannot be simply swept by polypropylene rings – packed snow and mud, or heavy road millings. It is not recommended using wire rings alone. They are typically combined with polypropylene rings on one attachment. See next page for more details.

- Designed for severe applications.
- · All steel construction.
- · Ideally to be combined with poly bristles.

CONVOLUTED (ZIG-ZAG) SHAPE RINGS

Convoluted rings are designed to be used without the distance rings due to their wavy design. This solution eases the installation and remove the need for using spacers. Although a little more attention is required during fitting. The convoluted design has high and low spots around the ring that need to line up correctly. Each ring is rotated a quarter turn on the rack.

FLAT SHAPE RINGS

Flat rings are typically used with spacers fitted in between each – ring, spacer, ring, spacer, and so on. Since they are flat, they do not need to be placed on the rack in any particular order. Naturally they allow fitting more flat rings on the rack, compared to convoluted design. For even denser broom, it is also possible to remove the spacers altogether.

WHY COMBINING BRISTLES MATERIALS?

Tough polypropylene bristles made of heavy-duty materials and steel filings with very aggressive cutting action will provide the best performance needed for breaking packed material and heavy debris which cannot be simply swept by polypropylene rings – packed snow and mud or heavy road millings. This combination provides best of both world – aggressive cutting action of steel and efficient sweeping of polypropylene fillings.

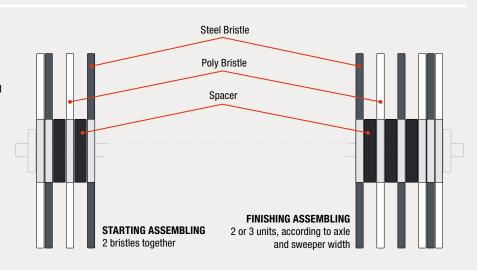

See table with quantities of rings and spacers to order depending on sweeper model.

| BOBCAT SWEEPER | TOTAL | POLYPROPYLENE RINGS (QUANTITY) | SPACERS (QUANTITY) | STEEL RINGS (QUANTITY) | |
|----------------|----------------|--------------------------------|--------------------|------------------------|--|
| DUDGAI SWEEPER | RINGS QUANTITY | P/N 7446744 | P/N 7446759 | P/N 6649126PACK | |
| Sweeper 110 | 25 | 13 | 23 | 12 | |
| Sweeper 140 | 32 | 17 | 29 | 15 | |
| Sweeper 155 | 36 | 19 | 33 | 17 | |
| Sweeper 185 | 43 | 22 | 40 | 21 | |
| Sweeper 215 | 48 | 25 | 47 | 23 | |

POLY 50% / STEEL 50% AXLE CONFIGURATION

See how the starting and finishing assemblies should be on 50% poly / 50% steel axle configuration

Note: this principle combining poly and steel bristles is not exclusive to 110, 140, 155, 185 and 215 models and can be used also on previous Bobcat sweepers.

ROAD REHABILITATION TOOLS AND TOOL HOLDERS

Grinding, milling and cutting asphalt, concrete and rocks are tough jobs requiring the right tools. We offer a selection of Bobcat carbide bits for planer, wheel saw and rotary grinder attachments.

- Demented tungsten carbide for exceptional wear resistance, air-hardened steel for toughness
- Latest body design for optimum penetration and rotation with washer for less stress and wear of retainer and holder system
- Tips designed to best match your application

TIPS

HOW TO REPLACE BITS SAFELY

- Wear approved personal protective equipment: eye and ear protection, steel toe cap shoes, protective helmet, gloves, and a vest.
- Do not change tools when the cutting chain, drum or wheel is moving or still engaged.
- Allow the attachment to cool down and always wear protective gloves to inspect or touch bits and conicals.
- 4. Exercise care when removing tools.
- Make sure tools are properly seated and securely retained.
- Inspect tools daily. Do not use dull, cracked, burred or bent tools.

| ATTACHMENT | OPTIMAL Application | SHANK DIAMETER | CUTTING PERFORMANCE | PN | QUANTITY PER BOX | DESCRIPTION | DRAWING |
|-------------------------------|----------------------------------------|-------------------|------------------------|--------------------------|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| | Asphalt | 20 mm | Premium | 7338747 or 7029624 | Sold individually | Long and wide blunt cap shaped carbide tip for longer life and high fracture resistance. For all types of asphalt and low density abrasive material. Washer to provide block protection and extractor grove easing bit removal during change. | |
| | riopinate | 0.76" | Standard | 7356716 | 75 pieces | Cost effective version of Bobcat's asphalt bit for all types of asphalt and low density abrasive material. Washer providing block protection and extractor grove for easy removal. | |
| Wheel Saw | Concrete, Rock - WS | 20 mm | Premium | 7010631 or 7285499 | Sold individually | Cylindrical shaped plug carbide tip for high impact and high density materials applications. Deeply recessed carbide for longer life. Washer to provide block protection and extractor grove easing bit removal during change. Large 12 mm diameter carbide tip for longer life, high penetration and maximum productivity. | |
| Planer | Paint Removal – Planer Heavy Duty | 0.76" | Standard | 7370901 | 50 pieces | Cost effective version of Bobcat's concrete, rock bit for high impact and high density materials applications. Washer providing block protection and extractor grove for easy removal. | |
| | Concrete, Rock – WS | 20 mm | Premium | 7338748 | Sold individually | Cylindrical shaped plug carbide tip for high impact and high density materials applications. Deeply recessed carbide for longer life. Washer to provide block protection and extractor grove easing bit removal during change. Slightly smaller diameter tip compared to 7010631 reduces tool price. | |
| | Paint Removal – Planer | 0.76" | Standard | 7439169 | 50 pieces | Cost effective version of Bobcat's smaller diameter tip bit for concrete, rock and high density materials applications. Washer providing block protection and extractor grove for easy removal. | |
| Wheel Saw – narrower width | Paint Removal | 13 mm 0.5" | Premium | 7024421 | Sold individually | Standard bit from the factory for planers with finishing drum, also used for some narrower width wheel saws. Smaller in size than normal planer / WS bits. For drilling in medium to hard conditions, high impact & abrasive applications. Flanged carbide tip for increased wear resistance in abrasive cutting. | |
| Planer – finishing drum | | | Standard | 7439170 | 300 pieces | Cost effective version of Bobcat's 13 mm bit for planer finishing drum, also used for some narrower width wheel saws. | 1 |
| 40 cm (16") Surface planer | Designed for removing paint from roads | 14 mm 0.55" | Premium | 6906904 | Sold individually | Standard bit from the factory for 40 cm (16") surface planer using 14 mm bit shank diameter. Highest density of smaller bits on the surface planer drum is designed for removing paint from roads. | |
| Wheel Saw | Heavy Duty Concrete, Rock | 20 mm 0.76" | Premium | 7339841 | Sold individually | Best bit for hard concrete with large aggregate or steel rebar. For drilling concrete and rock cutting. Supersized 15 mm diameter narrow bottom tip for maximum impact strength and tool life. Bit for those applications, where standard bits work their way out of the holders. Body with extractor grove easing bit removal during change. | |
| | | | Standard | 7439171 | 70 pieces | Cost effective version of Bobcat's bit with narrow bottom carbide tip for concrete, rock and other heavy duty application. | |
| Rotary Grinder RG20 | Heavy Duty Concrete, Rock | 20 mm 0.76" | Premium | 7021325 | Sold individually | Standard bit from the factory for RG20 rotary grinder. Large diameter cap type carbide tip grinds powerfully in concrete, asphalt or rock. Perfect tool for digging trenches, removing wall surfaces, partial or complete demolitions. Snap ring is included. | c a |
| Rotary Grinder RG40 & RG60 | Heavy Duty Concrete, Rock | 22 mm 0.86" | Premium | 7021230 | Sold individually | Standard bit from the factory for RG40 & RG60 rotary grinders, using larger 22 mm shank bore. Large diameter cap type carbide tip grinds powerfully in concrete, asphalt or rock. Perfect tool for digging trenches, removing wall surfaces, partial or complete demolitions. Snap ring is included. | |

Use Bobcat **6678073**, **6678074** tools for extracting worn bits from attachment when they need to be replaced.

FLAIL MOWER CUTTING TOOL KITS

Bobcat Self-Leveling Flail Mower Attachments are powerful tools designed for clearing uneven ground and difficult terrain of long grass and overgrown vegetation. When it is time to replace worn-out cutting tools, rely on Bobcat knife or hammer kits, which contain all you need for complete replacement.

- ▶ Kits contain all cutting parts and mounting hardware for complete drum rebuild.
- ▶ Two tool type options for different applications available.

CUTTING TOOL TYPES

- KNIVES great for cutting tall weeds and overgrown vegetation.
- HAMMERS usually used for tougher vegetation and heavier applications requiring more punch, for instance cutting saplings and denser overgrowth.

SL 60 Flail Mower

is equipped with 32 knives as standard and is not compatible with hammers.

SL 85 Flail Mower

can be equipped with either knives or hammers.

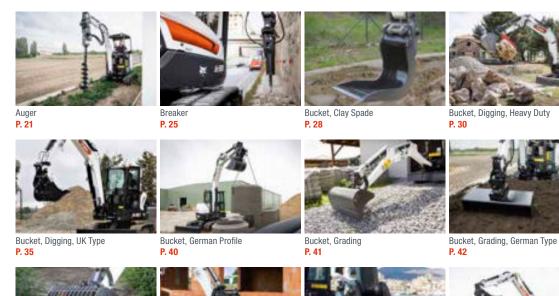

| FLAIL MOWER | TOOL TYPE | KIT PART Number | KIT CONTENTS | APPLICATION | PICTURE |
